

Cañon City High School

Cañon City, Colorado

Pathways Handbook
2023-2024

Dear Tiger Family,

The CCHS Pathways program is designed to inject learning relevance and engagement, and prepare students for postsecondary education and the workforce. Students may earn endorsements in particular disciplines at two graduated levels, Silver and Gold, early college credits toward an Associate's Degree, and industry-standard certifications, all while pursuing a high school diploma. Silver endorsements allow a student to explore a career field and even have time to pursue an additional Silver endorsement within the high school time span. Gold endorsements move a student more thoroughly into a career field and may result in multiple certifications or progress toward an Associate's Degree.

Each student at CCHS begins the Pathways journey by completing the Freshman Base Camp. The "Camp" provides freshmen a foundation on which to build their chosen Pathway.

The Pathways Program at CCHS consists of six Pathways:

1. Health
2. Science, Technology, Engineering, Agriculture, and Math (STEAM)
3. Skilled Trades, Security, and Industry
4. Arts, Hospitality, and Education
5. The Tiger Open Pathway (TOP)
6. Pathways in Technology Early College High School (PTECH)

Within these Pathways, students can select from numerous different careers that delve deeper into specific, yet, complementary disciplines.

Pathways students follow a curriculum that includes rigorous academic coursework, career-oriented courses, project-based learning activities, and research-oriented community projects, including a graduation Capstone. This academic structure provides students the opportunity to increase the depth and rigor of their education while giving them the freedom and flexibility to select which Pathways they choose to experience. Our curriculum includes a community-based learning internship in each student's chosen career field. We have 180+ community partners offering quarter-long internships. Every student must complete one internship to graduate.

Finally, Pathways purposefully restructures our 1,000-student high school into smaller learning communities and creates viable lanes from high school, to workforce, to college, to careers. The Pathways approach has taken root in an estimated 8,000 high schools across the country. In Colorado, CCHS is one of a few high schools to offer a full spectrum of career options under one roof.

Bill Summers

Principal, Cañon City HS

1313 College Ave.

Cañon City, CO 81212

School District Fremont RE-1 does not unlawfully discriminate on the basis of race, color, sex, religion, national origin, ancestry, creed, age, marital status, sexual orientation, genetic information, disability or need for special education services in admissions, access to, treatment, or employment in educational programs or activities which it operates.

Complaint procedures have been established for students, parents, employees, and members of the public. Complaints may be filed verbally, in writing or anonymously. If you wish to file a complaint using the district complaint form, please submit to: Ms. Jamie Davis, Director of Human Resources, Title IX, Section 504, and Americans with Disabilities Act Coordinator, 101 North 14th Street, Cañon City, Colorado 81212 – Telephone: (719)276-5700, Email:jamie.davis@canoncityschools.org

CAPSTONE SENIOR PROJECT

A Capstone project is a multifaceted graduation requirement for all students that challenges them to think critically, solve challenging problems, and develop life skills. Projects are interdisciplinary, requiring students to apply skills across many different subject areas. These projects encourage students to connect their projects to community issues and to integrate outside-of-school learning experiences including activities such as interviews, scientific observations, and internships. The table below shows the typical requirements and when/where (within what course) they can be accomplished. However, the Capstone is student driven and student managed and **does not** have to follow the typical timeline if a student wishes to complete it earlier in his or her high school experience. The Capstone process is clearly defined at this website: <https://sites.google.com/canonicityschools.org/cchscapstonecurriculum/home>

Grade	Capstone Components	CCHS Course Support
9th	Career Exploration and Selection Introduction to Capstone projects including initial brainstorming	Freshman English including pathway panels Capstone Advisory Course - begins during 2nd semester (a P/F graded course that earns .25 credits per quarter)
10th	Sophomore ELA	Write the Presearch Paper Capstone Advisory Course (a P/F graded course that earns .25 credits per quarter)
11th	Complete a project and an internship The majority of the project work is done during this year, especially during an internship	Capstone Advisory Course (a P/F graded course that earns .25 credits per quarter)
12th	Present Capstone not later than the end of the first semester	Capstone Course (a PA/P/F .5 credit earning course.) A senior must pass this project to graduate.

GENERAL REGISTRATION INFORMATION

To be classified as a full-time student, a student must be enrolled for the equivalent of four blocks of instruction (excluding Independent Study). A maximum class load is attained by taking five subjects per quarter. A student may take a sixth class (online or early college) with administrative approval. All freshman, sophomore, and junior students are required to take five classes unless approved by an administrator.

CLASS REGISTRATION

The annual master class schedule is built after students select courses. The number of sections, teaching allocations, and block assignments are made based on student registration requests. It is possible that a class may not be offered if too few students register for it.

During the second semester, freshmen students select courses they intend to take for the next three school years. Changes can be made after the first semester each year. Students/guardians should request courses that are in-line with a student's post-secondary plans, using the *Pathways Handbook*. Students must include at least three full semester alternative courses, or the equivalent, when completing registration. These alternative courses will be used if requested classes are in conflict.

SCHEDULE CHANGE POLICY

Any changes after the master schedule is published undermine the core scheduling process. Withdrawals from courses could jeopardize the offering of any course, especially second semester, which will have a direct impact on the other enrolled students. A "W" (Withdrawal) will be placed on a student's transcript when there is withdrawal from any requested course each quarter the class was scheduled. Students are responsible for ensuring their schedule and/or adjusted schedule meet athletic/extracurricular eligibility requirements. A "W/F" (Withdrawal/Fail) will be placed on a student's transcript if the student drops after the first five school days of class.

Students will receive their next-year's schedule prior to the end of the current-year registration process for an opportunity to make changes by contacting their CCHS counselor. Schedule changes will **not** be made to move a student into a course that pairs him/her with a friend, to select one teacher over another teacher that instructs the same course, or because of the time of day a specific course is taught. Schedule changes are not allowed after the end of the registration process unless necessary due to failure.

HIGH SCHOOL ATHLETIC/ACTIVITIES ELIGIBILITY

Any student who plans to participate in athletics or activities at CCHS must be enrolled in a minimum of 4, .5-credit bearing courses that meet daily. A student who is enrolled in 4, .5-credit courses, and a Teacher's Assistant (TA), and fails a .5-credit class will be passing 1.75 credits, and will be deemed ineligible for the one-week eligibility period. At the close of a semester, a student must have passed at least 3.5 credits in order to retain eligibility, or have passed 2 credits at the end of a quarter during the school year.

COLLEGE ATHLETIC ELIGIBILITY

Any student-athlete who plans to play sports in college at a Division I or Division II school must be registered with the NCAA Clearinghouse. It is recommended that student-athletes register with the NCAA during their junior year. Information and registering procedures may be found at www.ncaaclearinghouse.net. Procrastination in this process may result in athletic ineligibility during the freshman year of college. See your counselor for more information on which CCHS courses meet NCAA eligibility.

If a student plans to participate in an NAIA school, the student must register with the NAIA Clearinghouse during their junior year. Information and registering procedures may be found at <https://play.mynaia.org>.

PATHWAYS TO YOUR FUTURE: ADVANCED COURSE OFFERINGS

CCHS ADVANCED PLACEMENT (AP) COURSES

(All AP courses are also Honors Courses)

NOTE: In order for a student to earn the AP designation on their transcript, he/she must both pass the course and pass the AP test with a score of "2" or higher.

ELA	Natural/ Physical Sciences	Mathematics	Social Studies	Electives
AP Language & Composition	AP Biology	AP Statistics	AP Art History	AP Art & Design
AP Literature & Composition	AP Chemistry	AP Calculus	AP Psychology	
	AP Physics	AP Computer Science Principles	AP European History	
		AP Computer Science A	AP United States Government and Politics	

CCHS HONORS (H) COURSES

ELA	Natural/Physical Science	Mathematics	Social Studies
(H) English 9	(H) Integrated Science 9	(H) Trigonometry	(H) US History
(H) English 10	(H) Chemistry	(H) Pre-Calculus	(H) Colorado History
(H) Speech	(H) Zoology	(H) College Statistics	
	(H) Water Quality and Ecology	(H) College Algebra	
	(H) Hydrology and Watersheds		
	(H) Systems Go-PAE		
	(H) Systems Go-Rocket Design I		
	(H) Systems Go-Rocket Design II		
	(H) Intro to Biomedical Sciences		
	(H) College Anatomy and Physiology		
Electives			
(H) Computer Application III (Excel) and/or (Word)	(H) Invent2Prevent	(H) Spanish III	(H) Encore (must meet specific requirements - see Choir Director)
(H) Computer Application IV (Excel)	(H) Advanced Engineering Design	(H) Spanish IV	(H) Band (must meet certain requirements - see Band Director)
(H) Digital Graphic Design II	(H) Accounting II	(H) Teacher Cadet I	
(H) Advanced Game Design	(H) Journalism/Yearbook	(H) Teacher Cadet II	

CONCURRENT ENROLLMENT (CE)

(All Concurrent Enrollment courses are offered through Pueblo Community College)

English	Natural/Physical Sciences	Mathematics	Social Studies
American Literature and Argument	(H) Chemistry	Career Math	Psychology
AP Language & Composition	AP Chemistry	Technical Math	AP Psychology
World Literature	AP Physics	Financial Math	(H) Colorado History
AP Literature & Composition	AP Biology	Math for Liberal Arts	(H) US History
Technical Theatre	Principles of Biomedical Science	(H) College Statistics	Intro to Criminal Justice
Creative Writing	(H) College Anatomy and Physiology	(H) College Algebra	
Drama II	AP Environmental Science	AP Statistics	
Drama III	(H) Water Quality & Ecology		
Analytical Reading & Writing	(H) Hydrology & Watersheds		
(H) Speech			
CCHS Electives			
Computer Applications II	Child Development	Intro to Auto Tech	Precision Machining I
Computer Applications III - Word	Human Growth & Development	Auto Technology I	Precision Machining II
Computer Applications III – Excel	(H) Teacher Cadet I	Auto Technology II	EMS 115: First Responders
Computer Applications IV – Excel	(H) Teacher Cadet II	Auto Internship	Human Nutrition & Health
Business Management and Law	Engineering Design I	Welding 102	Medical Terminology

Computer Information Systems	Engineering Design II	Welding 103	Certified Nurse Aide Health Care (CNA)
Web Design	(H) Engineering Design III	Welding 104	Emergency Medical Technician (EMT)
A+ II: Software	(H) Advanced Engineering Design	Welding 106	Carpentry I & II
A+ I & II: Hardware	Ceramics I/II taken in the same semester	Welding 250	Digital Photography
Network +: Networking Fundamentals I & II	Advanced Ceramics	Intro to Fire Science	Film Editing
Accounting I	Advanced Studio Art	ProStart I	AP Seminar
(H) Accounting II	AP Art & Design	ProStart II	Capstone or Tiger Tech (12)
Video Production	Broadcasting	Intro Fire Science	

NOTE: CE/AP courses are dependent on the qualified staff available at CCHS during any given school year.

CCHS SUBJECT AREA GRADUATION REQUIREMENTS

Students planning to graduate from Cañon City High School must meet the minimum credit requirements as set by the Cañon City School District.

SUBJECT AREA	CREDIT REQUIREMENTS Classes of 2024 and beyond
English Language Arts	5 units of credit
Mathematics	4 units of credit
Science	2 units of credit
Social Studies	3.5 units of credit
Health/Physical Education	1.5 units of credit
Humanities	2 units of credit
Career & Technical Education	2 units of credit
Capstone	.5 unit of credit
Internship or Work-Study	1 unit of credit
Computer Education	0.5 unit of credit
Elective	10.5 units of credit
Total	32

MATH (see CCHS Math Tracks diagram in this handbook): requirements are listed in the following tables (CCS RE-1 Board of Education *Policy IKE-2.*)

LANGUAGE ARTS: requirements are listed in the tables (CCS RE-1 Board of Education Policy IKE-2.)

SCIENCE:

1. One credit in 9th-grade level Science (Attempted)
2. One credit in Biology or Horticulture (Attempted)

NOTE: Students attending a Colorado four-year college/university are required to have three years of natural science--two must be lab courses

SOCIAL STUDIES:

1. One-half (.5) credit in Geography as a freshman
2. One (1.0) credit of U.S. History or Honors U.S. History is required for sophomores or juniors
3. One (1.0) credit of American Government is required for juniors or seniors
4. One (1.0) Elective Credit is required

CAÑON CITY SCHOOL DISTRICT APPROVED GRADUATION REQUIREMENTS

All students **must accomplish a Capstone** in order to graduate unless a student moves into the district after the final day of a student's junior year.

Capstone (Required of all students)	
English	Math
Successful completion of District Approved Capstone	Successful completion of District Approved Capstone

In the case of a student entering the district after **the final day of the student's junior year**, a test score above these levels must be attained in both math and ELA in order for the student to graduate. These students may also voluntarily complete a Capstone in lieu of testing via the American Government Public Policy requirement.

Accuplacer		ACT		Advanced Placement (AP)	
English	Math	English	Math	English	Math
62	61	18	19	2	2

ASVAB		SAT		ACT Work Keys	
English	Math	English	Math	English	Math
31	31	470	500	Bronze or higher	Bronze or higher

Concurrent Enrollment	
English	Math
"C-" or higher in PCC's English 121	"C-" or higher in any PCC Math Course

ACADEMIC FAILURE AND CREDIT RECOVERY POLICY

Students who fail required graduation classes will not be allowed to take that course again other than at their own expense during credit recovery or Summer School. The course payments must be made prior to graduation. If a student fails to earn the credit within the session, the session cost will not be refunded. Correspondence/online opportunities may be taken with administrative approval.

TIGERS ONLINE - CREDIT RECOVERY

If a student fails a class due to non-compliance or non-productivity within the Work and/or Friday Sessions program, he or she will be placed into the Tigers Online Credit Recovery course for the remainder of the quarter.

ACADEMIC IMPROVEMENT COURSE (AIC)

Academic Improvement Class (AIC) - If a student requires academic support, they may be placed into the Academic Improvement Course. Students have time and focused instructional support to work on their courses so as to improve or maintain their grades. AIC is a P/F class that earns .25 credit per quarter. This course does not positively affect a student's GPA calculation. For students with an IEP, with admin approval, an IEP manager may assign a student both coursework and AIC to fill an area of credit deficiency.

CAÑON CITY SCHOOLS GRADE POINT AVERAGE CALCULATION AND STUDENT STRATIFICATION

The Cañon City School District (CCSD) Board of Education has established the following process to calculate grade point averages (GPAs), and stratification for all students enrolled in the high school.

1. CCHS does not publicly release student rank outside of a *percentage stratification* (top 5%, top 10%, top 25%, and top 50%).
2. Specific numerical rank is available with the following parameters:

Rank is based on GPA, under a 4.0-weighted system. Verified honors and AP courses use a 5.0-point system. The GPA formula and point value for each grade is listed below:

$$\text{GPA} = \frac{\text{total of points earned for each grade}}{\text{\# of courses taken}}$$

Regular Course

A = 4.0
B = 3.0
C = 2.0
D = 1.0
F = 0.0

Honors or AP Course

A = 5.0
B = 4.0
C = 3.0
D = 2.0
F = 0.0

- Specific rank is only accessible by the Principal and Counselors
- If exact ranking is REQUIRED, the Counseling Department or Principal can provide “_ of _ ranking” directly to an institution of higher education or scholarship committee upon specific and verified request.

3. Most courses will have a letter grade assigned and be a single contributor to the GPA calculation, including eighth-grade advanced math taken at the high school (includes Algebra I Part II and/or Geometry) and courses taken outside of CCHS (e.g., a college or online course) which must have prior administrative approval (see counselors for the approval form). *Those courses designated as "Pass" or "Fail" will not contribute to the GPA calculation.*

4. Other considerations:

- Students who transfer to CCHS from another school must attend the entirety of the second semester of their junior year in order to be stratified under the CCHS system.
- Any course that modifies content or grading for students on an Individualized Education Plan (IEP) will not count in the GPA calculation. In order to be stratified, a student must have 80% of his or her 4-year curriculum contained within the non-modified category.

PATHWAY ENDORSEMENTS:

Pathway Endorsement (Silver or Gold):

- Complete all pathway requirements listed in the *Pathways Handbook*

Renaissance Scholar:

- Complete all pathway requirements listed in the *Pathways Handbook* for at least **two** Silver Pathway Endorsements
- Earn a cumulative, weighted GPA of 3.2 or higher

GRADUATING WITH HONORS REQUIREMENTS CLASS OF 2024 AND BEYOND

All candidates for honors distinction must meet these requirements:

Requirement	Honors	Honors with Distinction	Honors for Excellence in CTE	Honors for Excellence in the Fine Arts
Number of total credits completed	36	38	36	36
Weighted GPA	3.75	4.0	Cumulative GPA of 3.5 or higher and GPA >3.75 in area of concentration	Cumulative GPA of 3.5 or higher and GPA >3.75 in area of concentration
AP/Honors credits completed or specific program requirements	7	10	Meet specific program requirements	Meet specific program requirements
Behavior	Must not have been suspended under a Level 3 or 4 discipline violation (see the <i>CCHS Student Handbook</i>), expelled from school, or violated the school's academic integrity standards			

SPECIAL NEEDS STUDENTS

CCHS will develop an Individual Education Plan (IEP) for students identified as having an educational disability. The plan will be formulated through an appropriate legal process in cooperation with parents or legal guardians. The successful completion of this plan will qualify the student for graduation.

CCHS MATH TRACKS

All CCHS students may select math courses based on the recommendations made in the CCHS Math Tracks diagram on the following page. At no time will a student be locked-in to a path; however, failure of specific math courses may earn consideration to take certain courses based on math proficiency and career choice.

Post Secondary Plan	CCHS Math Tracks				Additional
	Credit 1	Credit 2	Credit 3	Credit 4/5	
AA CTE	Foundations in Algebra (year-long) Algebra I Part I	MAT 107 (3cr.) Career Math Algebra I Part II	MAT 108 (4cr.) Technical Math	MAT 112 (3cr.) Financial Math Intro to Comp Programming	Statistics AP Computer Science Princ.
AA Humanities	Foundations in Algebra (year-long) Algebra I Part I	Algebra I Part II	MAT 120 (4cr.) Math for the Liberal Arts	MAT 135 (3cr.) (H) College Statistics	Geometry Intro to Comp Programming
AA STEM, Business, or 4-Year College Note: Accounting courses do not earn EC math credit, but accounting credit	Foundations in Algebra (year-long) Algebra I Part I Algebra I Part II Algebra I Part II Algebra I Part II Geometry	Algebra I Part II Geometry Algebra II Algebra II	Geometry Algebra II (H) Trigonometry	Algebra II (H) Trigonometry MAT 121 (4cr.) (H) College Algebra (H) Pre Calculus AP Calculus	MAT 135 (3cr.) (H) College Statistics AP Statistics AP Computer Science Princ. AP Comp Science A AP Physics Intro to Comp Programming

Math titles in red may be taken for early college credit

Math titles in gold background are HS exclusive credits

Research indicates that as society and technology rapidly change, 21st Century students must be able to collaborate effectively, engage creatively, and apply critical thinking skills to be successful candidates for the jobs of the future. Collaboration, creativity, and critical thinking are at the heart of the Tiger Open Pathway (TOP). Students who are accepted into the TOP program will enjoy a dynamic, flexible learning environment that values their unique interests and abilities, and develops 21st Century skills.

TOP learning is driven by personalization, relevance, and real-world community connections. Within the TOP program, advisors place a strong emphasis on assisting students in the development of personal responsibility and fortitude, social awareness, and intellectual growth. CCHS and TOP staff believe that “learning happens everywhere, and the world is our classroom.” In the TOP program, students enjoy diverse, on-site learning experiences at authentic sites outside of the traditional four-wall classroom.

Students in the TOP program have the advantage of blending online curriculum, project-based learning, and outdoor and community adventures with CCHS courses and programs. Students map out an individualized educational pathway that highlights their interests and challenges their strengths while being supported and guided by their teachers, advisor, and peers.

In traditional high school, a student’s progress toward meeting graduation requirements is typically measured by the successful completion of a given number of course credits. In the TOP, students demonstrate learning growth and progression toward meeting graduation requirements through the collection of Core Competencies mastery evidence and submission of Personal Progress Portfolios. TOP Core Competencies are demonstrated through the completion of graded and ungraded “courses” of study or designed learning experiences. Students within the TOP are not expected to graduate in a specified time but are expected to remain within the program until sufficient personal, social, and intellectual growth and mastery of Core competencies have been demonstrated through documented evidence and portfolio reviews.

Program Overview and Description

TOP Graduate Description

A well-prepared Tiger Open Pathway (TOP) graduate demonstrates effective personal communication, collaboration, critical thinking, creative problem-solving skills, and social-emotional/physical wellness through self-awareness and self-actualization by developing and utilizing Cañon City Schools' Student Empowered Learning Framework (SELF) Traits and Skills.

TOP Philosophy

The Tiger Open Pathway's (TOP's) learning philosophy includes the perspective that "the world is our classroom," and we engage most fully with the world when asking questions while immersed in experiences that provide different perspectives or lenses for viewing and/or interacting with it and within it. Interactive engagement teaches us new ways of thinking, new ways of knowing, and new ways of organizing information, practices, and ideas. To achieve worldly, interactive engagement with purposeful/intentional learning, TOP strives to provide a place-based, hands-on, experiential education through on-site field trips and outdoor expeditions.

TOP Curriculum

The TOP curriculum encourages autonomous consumption, mastery, and production of knowledge as well as personal responsibility for emotional, intellectual, and character (leadership and community stewardship) growth and development. Each student in the TOP embraces a self-directed curriculum that is seen as a direction and not as a destination as students chart their own, highly-individualized educational pathway.

Our goal is that through self-directed learning, collaboration with teacher Advisors (consultative guides versus didactic instructors), and shared experiences every student in the TOP will become self-empowered and develop the essential SELF traits and skills necessary to shape and become stewards of the world as they wish it to be.

Program Graduation Requirements

Unique Expectations, Traditional Diploma

In traditional high school, a student's progress toward meeting graduation requirements is typically measured by the successful completion of a given number of course credits. In TOP, students demonstrate learning growth and progression toward meeting graduation requirements through the collection of **Core Competencies (CC)**. Mastery is evidenced through the submission of work and reflection in their progress portfolios. Students within the TOP are not expected to graduate in a specified time but are expected to remain within the program until sufficient personal, social, and intellectual growth and mastery of Core Competencies have been demonstrated through documented evidence and portfolio reviews. Students must include the following Core Competencies in their portfolios before graduation.

Core Competency 1: Positive Self and Social Awareness and Development

As TOP students develop broad and specialized knowledge, engage in experiential learning, and deepen their awareness of our shared social contexts through group expeditions, they will emotionally change, develop and grow. These experiences will lead to greater self-awareness, social awareness, self-development, self-regulation, and self-actualization.

TOP Orientation Introductory Essay: Students write a letter to themselves in which they describe who they are as a person and as a learner and who they wish to become

Social-Emotional Learning Plan (SELP) Goal: Each semester, students complete the deliberate process of self-awareness and reflection by writing a personalized social-emotional goal, reflecting on personal growth, and assessing personal development.

Edgenuity SEL Curriculum: Students complete a brief online course where they will learn the principles of mindfulness and self-awareness.

SEL and Mindfulness Practice: TOP students develop and regularly practice SEL and mindfulness strategies in the classroom for personal social-emotional growth and development.

TOP Exit Review Reflective Essay: Students write a reflective essay where they describe who they are as a person and as a learner after participating in TOP.

Core Competency 2: Passages Program

Passages are personally relevant experiential projects designed and developed by students in six different areas to demonstrate the ability to apply their SELF Traits and Skills. The Passage process includes writing a proposal; receiving approval from a committee of peers and an advisor; interviewing and learning from a professional consultant; researching and reading material related to the passage; developing a timeline; creating a product or service; reflecting on the process; presenting the final passage, and documenting the work in their progress portfolios.

Career Awareness and Exploration: Students will explore a career related to personal interests, skills, and experiences. Essential parts of this Passage include a personal profile, interviews, hands-on experience in the chosen career, a resume, an investigation into the training or education necessary to enter the field, an investigation into current and projected wages and the projected future of the career, and an exploration of other related fields.

Practical Skill: Students will learn a skill that will serve them in the future. This could involve the development of a skill that the student is interested in and will yield a product such as baking bread, welding, sewing, or carpentry. Students can also choose to complete this Passage by mastering such activities as learning a second language, learning to code, or improving communication and public speaking skills.

Creativity: Students will explore a concept, develop a design, and carry out a process to make a unique personal final product. The Passage intends to help understand and engage in the creative process: generating ideas, planning, solving problems, making changes, and understanding WHY they made them. Creativity is not limited to the arts!

Logical Inquiry: Students will follow a scientific process to discover an answer to a question or problem that has personal meaning and relevance to them. This Passage is about thinking and rethinking a problem, introducing a variable, and measuring the effects of that variable. The process demands the use of reasoning, problem-solving, research, investigation, data collection, analysis, synthesis, conclusions, and self-critique.

Adventure: Students will complete a personal quest or adventure to prepare them for life as a graduate. The steps will resemble the process of a mythical hero's journey. By leaving a familiar environment (physical and/or social-emotional), students will be tested by facing the risks and challenges, both known and unknown, internal and external. In the end, they will be transformed by their journey and will be better prepared for their entry into their new role as an adult.

Global Awareness/Senior Study: Students will find a way to help "create the world as they believe it ought to be." The student will identify issues, concerns, problems, or objectives in their community and/or the larger world; plan and articulate intentions with thoughtfulness; implement and exercise strategies for addressing the identified issues, concerns, problems, or goals. The final project can take the form of a product or service that provides aid to the identified problem.

Core Competency 3: Wide Knowledge Requirements (WKR)

A well-rounded education features the consumption of diverse and relevant information and the formation of foundational knowledge in the development of skills and traits. TOP Wide Knowledge Requirements will be earned and mastered through a diverse, blended learning environment to include vetted and approved Project Based Learning (PBL), traditional main building classes, expeditionary/experiential learning, or online courses.

Artistic Expression (2 Experiences): The study and practice of any of the arts, which might include visual arts, creative writing, dance, music, performance, and industrial arts. Students can meet this requirement by taking traditional music or art classes (.5 credits = 1 experience) or participating in Encore or musicals (1 production = 1 experience). Documented private musical experiences and performances such as guitar or piano recitals also count.

Humanities and Cultural Exploration (3 Experiences): The study of human constructs, human experiences, and concerns, which can include philosophy, language, history, and religion. Students can meet this requirement by taking traditional or online courses in philosophy, language, religion, or psychology (1 credit = 1 experience) or by designing a PBL with an advisor to meet state standards. PBL must have a documented, vetted, approved literature requirement.

Mathematics as a Lived Experience (4 Experiences): The study of abstract concepts such as quantity, structure, space, and change; mathematics is a tool for making informed judgments and decisions regarding issues that involve quantitative reasoning, which can include statistics, ratios, percentages, and probabilities. Students can meet this requirement by taking traditional or online math courses (1 credit = 1 experience) or by designing a PBL with an advisor to meet state standards.

Natural and Life Sciences (2 Experiences): The study of the structure, function, and/or behavior of a natural phenomenon, and the development and testing of theories to describe these findings. These studies might include the sciences of climate change, biology, anatomy, nutrition, geology, astronomy, physics, chemistry, etc. Students can meet this requirement by taking traditional or online science courses (1 credit = 1 experience) or by designing a PBL with an advisor to meet state standards.

Social Sciences (3 Experiences): The study of human behavior and cultures, including the study of sociology, anthropology, governmental systems, economics, etc. Students can meet this requirement by taking traditional or online science courses (World Geography, US History, Colorado History, and US Government (req) = 1 experience) or by designing a PBL with an advisor to meet state standards.

Other Requirements: Students must complete 1 credit of English 9, Business Applications, and Choices. Additional math and science courses are recommended for college-bound students (1x each).

Core Competency 4: Critical Thinking and Communication Skills

Embedded within the TOP curriculum via Passages and reflections are opportunities for sustained, student-directed critical thinking, reading, speaking, and writing.

Reading: Students will choose six texts (one per passage, approved by an advisor). These can be nonfiction or fiction books that relate directly to their Passage learning. They will read, review, and apply knowledge to their projects. Additionally, students will choose a text if they decide to create a humanities PBL project to meet the requirements of the Humanities WKR.

Writing: Students will complete written reflections for each passage, onsite field trip, expedition, SELP goal, and PE goal. These reflections will demonstrate their ability to reflect and communicate about their experiences in a professional and organized manner. Passages and PBLs may also require additional writing in the form of research summaries, annotations, annotated bibliographies, literature reviews, exploratory essays, screenplays, scripts, short stories, poetry, technical manuals, and contextualized personal narratives,

Communicating: Students will present their passages and PBL projects to their peers, advisors, professional consultants, and TOP staff each semester. These presentations will demonstrate their ability to present information in a logical, organized, and effective manner. Students will also expect to participate in weekly advisory meetings, interviews with their professional consultants, tuning protocols, governance meetings, etc.

Core Competency5: Physical Wellness Requirement

The TOP believes in the connection between a positively happy and healthy mind and body. To that end, each student will engage in a deliberate process and program of personal physical activity and wellness development by setting a Physical Exercise Plan (PEP) goal and/or healthy choices program at the beginning of each semester. Students will self-reflect and assess their growth and progress before writing a new one for the proceeding semester. Goal examples could be to run a 10K, participate with the Mountain Bike Club, hike locally four times a week, etc. The goal and prescribed program will meet the needs of each individual. Students participating in an organized physical activity such as a sports team, dance team, yoga, or main building PE class will have that experience count toward this requirement. The PEP goal will be written and stored in students' progress portfolios.

Core Competency 6: Environmental Stewardship and Community Service

The TOP practices a Leave No Trace ethic on all expeditions and embeds sustainable practices and environmental stewardship in everything we do. Additionally, the TOP believes in the importance of giving back to the community and recognizes that students gain social awareness and develop other important, life-long skills through community service. Students are required to participate in TOP-organized onsite community service and learning days and/or complete and document a minimum number of 6 community service hours per quarter/ 24 hours per year. Students must track and document hours and keep logs in their progress portfolios.

Core Competency 7: Community-Based Internship/ Professional Work Experience

Each student in the TOP is required to complete a semester-long internship through the PalCE program or an approved professional work-study experience. (See PalCE for requirements).

Core Competency 8: Expeditionary and Onsite Learning Experiences

Expeditions and on-site learning days are an essential part of the TOP experience and are critical components in the development of self-awareness, social awareness, SELF traits & skills, community engagement, experiential learning, and of the core tenet that “the world is our classroom.” To this end, students are mandated to attend all expeditions and on-site learning days, and will only be excused from participation for valid medical reasons or third-party excusals.

Core Competency 9: Personal Progress Portfolios

Students will create a digital and paper portfolio containing evidence and documentation of all Core Competency requirements. Students will regularly add materials to and update their portfolios with relevant performance assessments. Portfolio maintenance is the responsibility of the TOP student with guidance from their advisor. Students and advisors will participate in formal personal progress portfolio reviews at the end of each semester to reflect on progress rate, evaluate future scheduling, and monitor expectations to maintain in the program.

Welcome to Freshman Base Camp!

The mission of Cañon City High School's Freshman Base Camp is to help new Tigers transition into The Pride Community where they will be empowered to achieve success academically and socially.

Just like beginning mountain climbers learning to traverse their first Colorado 14er, incoming freshmen at Cañon City High School might need the help of a group of experienced high school students and teachers to fill their backpacks and gather their bearings in the building where they will be spending much of the next four years.

As a freshman, students will be challenged with 10.5 credits. Freshman Base Camp offers several new and exciting concept programs:

- Freshman Base Camp offers cohort scheduling for freshmen so they get a chance to learn together and build relationships between same-age peers and teachers to help provide academic and social support while they navigate the road ahead.
- Students will be required to take a year-long English class where career skills are incorporated, including time management, organization, public speaking, and research skills.
- Students will be required to take two math classes during their freshman year, cementing these skills and preparing them for the PSAT 9 test.
- Students will receive individual counselor-assistance, with both academic and social issues, including coping and stress management techniques.
- All freshmen will be assigned to an upper-class Link Crew leader before the school year begins in a 15 to 2 ratio. The Link Crew program is designed to make the transition to high school, academically and socially, easier and more successful. Please ask your student who his or her leader is and encourage maximum participation in all Tiger Pride events!

Through these programs and relationships, students will embark on their own personal quest and select specific Pathways to help them prepare for whatever college or career path they choose. At the end of their first year, we hope all incoming Tigers will be prepared to continue on to their future, with the eventual goal of reaching the summit-- graduation!

The **Arts, Hospitality, & Education Pathway** encourages students to express their creativity through a variety of different mediums while exploring career options. The **Arts, Hospitality, & Education Pathway** emphasizes creative problem solving, public performance, cultural enrichment, art appreciation, communication, and critical analysis.

PATHWAYS

Creative students who see themselves designing, producing, exhibiting, performing, writing, or publishing multimedia content will want to pursue courses in the **Arts, A/V Technology, & Communications Pathway**.

The **Hospitality & Tourism Pathway** allows students to learn how to explore the beauty, culture, and cuisine of the world around them. Introducing students to management, marketing, and operations of restaurants, lodging, attractions, recreation, and travel service.

The **Performing Arts Pathway** prepares students for further study in vocal music, instrumental music, and theater.

The **Visual Art & Design Pathway** gives students an opportunity to experience a wide range of media and concepts to explore ideas and themes for understanding cultural and individual expression. Students will develop a portfolio for a wide variety of career paths post graduation.

The **Education Pathway** prepares students who are interested in a teaching career and working with youth by giving them a variety of real world experiences. Students will gain the skills needed to pursue an Education degree.

The **Health Pathways** offer students a thorough education in a high-demand field that has no foreseeable downward trend in human interaction. Whether your desire is to join a career locally or internationally, health care is needed across the spectrum of geography. Further, with advancing technology, health care will change over the coming decade to become both exciting and extremely rewarding as improving people’s lives is its primary focus.

The **Health Pathways** includes coursework in world languages, business, technology, and sociology. This Pathway emphasizes health science, cultural literacy, business fundamentals, customer service, interpersonal skills, employability, ethics, and leadership.

PATHWAYS

- The **Health Science Pathway** helps students develop an understanding of the human body, nutrition, wellness, and medicine. It further allows students who wish to enter the medical career field to experience patient care through the Certified Nurse’s Assistant (CNA) and Emergency Medical Technician (EMT) programs.
- **Exercise Pathway** helps students develop an understanding of the human body, nutrition, wellness, and medicine.
- **Mental Health Pathway** helps students develop an understanding of wellness, nutrition, and medicine in regards to mental health.

Skilled Trades careers are for highly motivated individuals that have a desire to work with their hands and receive an industry standard education. CCHS offers training in the high-demand fields of Security (Criminal Justice and Fire Sciences), Carpentry, Precision Machining, Automotive and Welding. With the training provided in one or more of these areas, dedicated students will acquire the necessary skills and workmanship to obtain entry level employment at the culmination of the program, if not sooner.

Successful individuals demonstrate the following:

- | | |
|---|---|
| <ul style="list-style-type: none"> ● A strong work ethic ● A willingness to learn proper procedures ● Acceptance of constructive criticism ● An openness to attempting new activities | <ul style="list-style-type: none"> ● Problem solving abilities ● Quality control ● Critical thinking skills ● Pride in a job well done ● Ability to work as a team |
|---|---|

PATHWAYS

The **Automotive Pathway**, in conjunction with Pueblo Community College, trains students to understand and diagnose automotive systems, and prepare them for a successful career in the automotive repair industry. Students can expect to experience real world situations in our state of the art automotive lab. Students will earn multiple certificates and certifications from leading industry partners like Subaru, ASE, TIA, Gates, Ford ASE, S/P2, and many others.

The **Carpentry Pathway**, in conjunction with the Canon City Home BI-ED, is a self-funded, non-profit entity, and it provides students the opportunity to experience real world training as a typical project involves the construction of a home from the ground up. Students can expect to work hands on at a real job site using the tools of the trade as well as gain experience in cabinetry and fine woodworking.

The **Precision Machining Pathway** teaches students how to operate a variety of machines found in industry to create exacting parts to specifications out of a variety of materials. Students can expect to complete several required projects utilizing milling, turning, and CNC machining equipment.

The **Welding Pathway**, in conjunction with Pueblo Community College, prepares students for a career in welding and manufacturing settings, small job shops, city and government welding centers, and related sites. They may also work as a self-employed welder. Students can expect to learn the fundamentals that pertain to the OFC (Oxy Fuel Cutting), PCT (Plasma Cutting Torch) processes, and SMAW (Shielded Metal Arc Welding) process.

The **Security Pathway**, in conjunction with Pueblo Community College, prepares students for a career in the military, criminal justice, or fire sciences. CCHS offers fully accredited college courses, propelling students into the career fields immediately following high school, or when they reach a required age.

STUDENT CLUBS

- Auto Club
- Skills USA
- Link Crew Leadership

STUDENT ACTIVITIES

- JROTC Rifle Team
- JROTC Drill Team/Honor Guard
- JROTC Raider Platoon

Automotive

The **Automotive Pathway**, in conjunction with Pueblo Community College, trains students to understand and diagnose automotive systems, and prepare them for a successful career in the automotive repair industry. Students can expect to experience real world situations in our state of the art automotive lab. Students will earn multiple certificates and certifications from leading industry partners like Subaru, ASE, TIA, Gates, Ford ASE, S/P2, and many others.

The **Science, Technology Engineering, Agriculture, & Math Pathway** is designed for students with a passion for applying math and science concepts to solve problems, enhance understanding, and create innovative systems that explore and affect our ever-changing and demanding world. Class work emphasizes inquiry-based problem solving, analytical thinking skills, and computer applications.

PATHWAYS

The **Science Pathway** prepares students for a future in the pervasive and profitable science discipline. Students interested in science can choose courses that implement the scientific method across the spectrum of natural and physical sciences.

The **Technology Pathway** prepares students for a future in the pervasive and profitable tech industry. Students interested in technology can choose courses that implement flexible tech principles and applications.

The **Engineering Pathway** prepares students for a future in the pervasive and profitable engineering industry. Students interested in engineering can choose courses that implement industry-standard principles.

The **Agriculture Pathway** prepares students to engage in the fast-growing agricultural industry using the three main components: a strong curriculum, community partnerships, and structured agricultural experiences.

The **Math Pathway** prepares students for a future in mathematical career fields. Students interested in math can choose courses that implement a deep understanding of numerical principles.

STUDENT CLUBS

The **Pathways in Technology Early College High School** pathway is designed for students with a passion for Advanced Emergency Medical Services, Automotive Technology, Fire Science, or Computer Information Systems. Class work emphasizes career-based curriculum, college and career skills, and practical application.

Joining this program will provide students with their high school diploma and their Associate’s Degree from Pueblo Community College free of cost. The program is non-traditional, meaning students can complete the program in 3-5 years. Students have the opportunity to complete their high school diploma and associate’s at the same time, but this is dependent on the student and on course offerings from PCC. Students also have the ability to finish their degree up to two years after high school.

PATHWAYS

The **Advanced EMT Pathway** prepares students for a future in the medical field as a paramedic or AEMT.

The **Automotive Technology Pathway** prepares students for a future as an automotive technician with the potential to earn a multitude of industry recognized certificates.

The **Fire Science Pathway** prepares students for a future as a qualified firefighter, both in traditional worksites like municipal fire stations and on wildland fire sites. Within this pathway students can choose between two different options:

- Firefighter with EMT certificate
- Wildland Firefighter

The **Computer Information Systems Pathway** prepares students for a career in technology, within a robust and highly demanded career field. Within this pathway students can choose between eight different options:

- Computer Information Systems- Associate’s of General Studies (direct transfer to Colorado State University-Pueblo’s Bachelor’s of Computer Information Systems)
- Graphic Design
- Health Information Systems
- Health IT: Medical Coding
- IT Systems Administration
- Networking Cyber Security
- Software Development and Security (direct transfer to PCC’s Bachelor’s of Secure Software Development)
- Web Design and Development

STUDENT CLUBS

- National Honors Society
- Link Crew Leadership
- Auto Club
- eSports

PTECH-Advanced EMT

The **Advanced EMT Pathway** prepares students for a future in the medical field as a paramedic or an Advanced EMT. Qualified EMTs and paramedics continue to be in demand, both in traditional worksites like ambulance agencies, and with recent legislative additions (SB19-052, leg.colorado.gov), worksites like hospitals and long-term care facilities. Not only is there a 7% expected growth (faster than average) in the United States, there is a 32% projected growth in the state of Colorado (2020, onetonline.org). However, these numbers do not include the recent legislation that allows EMTs to work under the “medical supervision of a licensed physician, physician assistant, advanced practice nurse, or registered nurse,” in any licensed health care facility (SB19-052). Our goal is to fill the workforce gap, including careers as explained by SB19-052, with younger students who will enter the workforce earlier and have a longer career.

(Courses with an asterisk (*) are courses that will be completed on the PCC campus. Credits are listed as “college credit/high school credit”.)

(Students must pass the National Registry of EMT Certifying Exam to continue in the program.)

PTECH-Automotive Technology

The **Automotive Technology Pathway** prepares students for a career as an automotive technician. The demand for qualified automotive technicians has exceeded supply since the 1990's. They flag as much as \$125 in labor rates per hour for their shops and potentially earn \$100,000 per year within five years of training completion. Also, there is a 20% turnover rate in the industry. Paired with our American vehicle population increasing by 3 million per year, this means that the shortage of automotive technicians remains concerning. Our goal is to fill the gap in the workforce with qualified, younger students who will enter the workforce earlier and have a longer career to help stabilize the industry.

PTECH-Fire Science

The **Fire Science Pathway** prepares students for a future career as a firefighter. Qualified firefighters continue to be in demand, both in traditional worksites like municipal fire stations and on wildland fire sites. Additionally, firefighters with EMT training are especially in demand. A firefighter who is also an EMT significantly increases the competitive edge in hiring within fire departments. The outlook for forest firefighters, or wildland firefighters, is also positive. The increase in forest firefighter demand is directly related to the increasing number of western wildfires annually, plus lengthening of the fire season by 5 months since the early 1970s, according to the Union of Concerned Scientists.

PTECH-CIS: General Studies

The **CIS: General Studies Pathway** prepares students for a future in Computer Information Systems. The CIS program teaches students basic networking, programming, and database technologies as well as technical aspects of the internet and data communications. The Associate of General Studies Degree with an emphasis in Computer Information Systems prepares students to transfer to Colorado State University-Pueblo as a junior to pursue a Bachelor's Degree in Computer Information Systems.

PTECH-CIS: Graphic Design

The **CIS: Graphic Design Pathway** prepares students for a future as a layout artist, illustrator and/or website designer. This program teaches students to use current industry software to design and develop graphic elements that are produced for electronic and print communications. The integrated curriculum includes courses in fine art and design, graphic arts, computer layout and illustration, and small business planning. Courses are taught on both PC and MAC platforms.

Graphic Design is a highly competitive field and the key to starting a career is developing industry demanded skills and a portfolio to showcase your talents. Throughout the program, portfolio development and attaining the best business practices is emphasized with utmost importance.

The Graphic Design program prepares students for an entry-level career in graphic design and production. Career options range from working for a large corporation, print and sign shops, television and news organization as a digital artist, website design, news, advertising.

PTECH-CIS: Health Information Systems

Few professions offer the level of diversity in positions and tasks, as well as job security, as Health Information Technology (HIT). HIT is positioned at the intersection of healthcare, technology, and business. HIT professional duties span medical coding, clinical documentation integrity, supporting and creating required computer systems, data analytics, management, patient privacy, network security, and beyond. HIT professionals empower partners in healthcare to provide high-quality, efficient, financially prudent, and life-saving care.

What Do Healthcare Information Systems Specialists Do?

Health information technology (health IT) specialists handle the technical aspects of managing patient health information. Depending on their position, health IT professionals might build, implement, or support electronic health records (EHRs) and other systems that store patient-related data. They know what data is needed, where it is stored, and how the data is used.

Their work affects quality of care tremendously. As they move up the ladder, health IT specialists become more involved in collaborating with other health-care teams to drive improved patient outcomes, lower costs, and new developments in patient care.

PCC’s HIT programs, staff, and students are affiliated with the global Health information Management Systems Society (HIMSS), the premier national association of health information management (HIM) professionals and the leading source of HIM knowledge.

After completing the stringent processes through the American Health Information Management Association to be identified with the AHIMA Professional Certificate Approval Program (PCAP) and successfully earning the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) accreditation, PCC HIT students are not only prepared to earn the AHIMA Medical Coding Credentials, they are eligible to sit for the Registered Health Information Technician (RHIT) credentialing exam.

(Courses with an asterisk (*) are courses that will be completed on the PCC campus. Credits are listed as “college credit/high school credit”.)

PTECH-CIS: Health IT Medical Coding

Health Information Technology (HIT) is the combination study of healthcare and information technology. The Medical Coding student has the option to complete the HIT Medical Coding Certificate and test for the Certified Coding Associate (CCA) or Certified Coding Specialist (CCS) exam. This will make the student immediately employable for an entry-level or mid-level position as a certified coder in an acute-care hospital, ambulatory, long-term or skilled-care nursing facility, physician office, insurance company, and any other setting using medical coding.

Specialization is growing in all areas of coding and coding management, allowing the coding professional to narrow or broaden their scope of practice through new and innovative roles within the healthcare field (e.g., clinical data specialist, medical records reviewer, medical records field technician, remote medical coder, reimbursement specialist, various registries, and coding auditor).

PCC’s HIT programs, staff, and students are affiliated with the American Health Information Management Association (AHIMA), the premier national association of health information management (HIM) professionals and the leading source of HIM knowledge.

After completing the stringent processes through the American Health Information Management Association to be identified with the AHIMA Professional Certificate Approval Program (PCAP) and successfully earning the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) accreditation, PCC HIT students are not only prepared to earn the AHIMA Medical Coding Credentials, they are eligible to sit for the Registered Health Information Technician (RHIT) credentialing exam.

PTECH-CIS: Networking Cyber Security

The **CIS: Networking Cyber Security Pathway** prepares students for a future career in security administration and technical support with a focus on cybersecurity. Globally, the shortage of cybersecurity professionals is nearly 3 million.

The PCC CIS department has been awarded the designation of “National Center of Academic Excellence in Cyber Defense Education” by the National Security Agency of the United States of America (NSA) and the U.S. Department of Homeland Security. This program has met the stringent academic standards and institutional criteria established by the NSA and DHS. These programs contribute graduates to the cyber workforce in support of the nation’s industry and government employers.

Coursework includes training in the assessment and resolution of network problems, breeches, encryption, disaster recovery, and maintenance. Coursework includes training in PC hardware and operating systems, Windows servers, networking, routing, security, and virtualization. Students can prepare for industry certifications such as CompTIA A+, Network+ and Security+ creating an important advantage in gaining employment in today’s job market.

(Courses with an asterisk (*) are courses that will be completed on the PCC campus. Credits are listed as “college credit/high school credit”.)

PTECH-CIS: Software Development & Security

The **CIS: Software Development & Security Pathway** prepares students for a future career in software development. Software development was the second-largest job ad by occupation in Colorado at the end of 2019. Employment of software developers is projected to grow 24% from 2016 to 2026, much faster than the average for all occupations. Software developers will be needed to respond to an increased demand for computer software. The median annual wage for software developers (applications) was \$101,790 in May 2017. The median annual wage for software developers (systems software) was \$107,600 in May 2017.

This program offers students to learn computer programming in Java, database development fundamentals, design and development of software application, analyzing business problems and designing solutions, Structured Query Language (SQL), Client-Scripting (JavaScript), and mobile app development. This program is a direct transfer to PCC’s bachelor’s degree of Software Development.

(Courses with an asterisk (*) are courses that will be completed on the PCC campus. Credits are listed as “college credit/high school credit”.)

PTECH-CIS: Web Design & Development

The **CIS: Web Design & Development Pathway** prepares students for a future career as a web designer. The Web Design and Development program provides high demand skills in the digital world of information and technology. The PCC Web Design and Development degree prepares students for a career in web-based multimedia applications with an emphasis on web coding and development. You will be able to employ current technologies, manage, and test digital media applications that adhere to the industry standards. Students practice communications theory, conceptual and creative development, and careful consideration of the “end-user” experience. All while meeting the needs of customers with sound business practices. You will gain knowledge to earn gainful employment or start your own business.

The Web Design and Development program teaches students the necessary coding languages to build and maintain websites, mobile applications, and other interactive multimedia. We go beyond the basics, adding the high demand skills of database development, basic networking, aesthetics, and search engine optimization and analytics. This integrated curriculum includes courses in business, communication, design, and project management. The software applications are current with industry standards.

(Courses with an asterisk (*) are courses that will be completed on the PCC campus. Credits are listed as “college credit/high school credit”.)

ACADEMIC CORE

ENGLISH LANGUAGE ARTS

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Language Arts 1	A		9,10,11,12	1	ILP; IEP, ELL; MTSS; Teacher approval or Recommendation; demonstrate below grade-level reading proficiency by most recent evaluation
Language Arts 2	A		9,10,11,12	1	ILP; IEP, ELL; MTSS; Teacher approval or Recommendation; demonstrate below grade-level reading proficiency by most recent evaluation
Language Arts 3	A		10,11,12	1	ILP; IEP, ELL; MTSS; Teacher approval or Recommendation; demonstrate below grade-level reading proficiency by most recent evaluation
Language Arts 4	A		10,11,12	1	ILP; IEP, ELL; MTSS; Teacher approval or Recommendation; demonstrate below grade-level reading proficiency by most recent evaluation
English 9	A		9	2	Demonstrate grade-level reading proficiency by most recent evaluation
(H) English 9	H		9	2	Demonstrate above grade-level reading and writing proficiency by most recent evaluation in middle-school English classes
English 10			10	1	English 9 or (H) English 9
(H) English 10	H		10	1	English 9 or (H) English 9 with a teacher recommendation
List A					
American Literature & Argument	C, X,	ENG 1021	11,12	1	English 10
AP Language & Composition	H, C, X,	ENG 1021	11,12	1	English 10 or (H) English 10
English 11	X		11	1	Language Arts 10 or English 10
World Literature	C, X	ENG 1022	11,12	1	English 10 or (H) English 10 completion of ENG 121 for Concurrent Enrollment
AP Literature & Composition	H, C, X	ENG 1022	11,12	1	English 10 or (H) English 10 completion of ENG 121 for Concurrent Enrollment
Analytical Reading and Writing	C	ENG 1031	11,12	1	English 10 or (H) English 10
Creative Writing	C	ENG 2021	11,12		English 10 or (H) English 10
English 12	X		12	1	English 10; English course at the junior level
List B					
Podcasting			11, 12		Language Arts 10 or English 10
STEM Communication and Writing	H,C	ENG 1031	11,12	1	English 10 or (H) English 10
Drama III	C	THE 1005	10,11,12	1	Drama I and Drama II

(H) Speech	H, C	COM 1150	10, 11,12	1	English 9 or (H) English 9
Technical Theatre	C	THE 1016/1031	9,10,11,12	1	
Video Production I	C	RTV 1005	10,11,12	1	
Broadcasting	C	JOU 1005	10,11,12	1	Video Production I; competitive selection process
Film Editing	C	MGD 1064	10, 11, 12	1	Video Production I

NOTE: Juniors and seniors are required to successfully complete a full credit of English during each year, and at least one must come from List A. Some List B courses can be taken for Humanities credit instead of English credit if they're taken in 9th or 10th grade. See the Theatre and Video Production page for a full list.

LANGUAGE ARTS 1 - This semester-long course is designed for students who require a modified curriculum using a variety of strategies to improve their functional reading and writing skills in order to communicate their needs in a community setting. There is also a prescriptive, research-based curriculum that offers grade-level content which is highly modified to meet individual student needs.

LANGUAGE ARTS 2 – This year-long course will allow students to explore the writing process and to build upon their reading and analysis skills. Students will write a paragraph with a thesis statement, two or more details, and transitional phrases or wording. Students will learn to write drafts, use graphic organizers, and revise their writing. The writing aspect of this class includes the study of grammar and usage as well as vocabulary. The reading element of this course will integrate reading comprehension, fluency, vocabulary, decoding skills, and written expression to help students improve their reading skills.

LANGUAGE ARTS 3 - This year-long course will work on strengthening reading fluency and comprehension, analyzing, and decoding skills. Students will analyze literary elements in short stories, essays, novels, and plays. Students will also explore the writing process through the study of grammar, usage, vocabulary, outline organization, thesis statements, drafting, and revising a five-paragraph essay.

LANGUAGE ARTS 4 - This year-long course will work on strengthening reading fluency, comprehension, analyzing, and decoding skills. Students will analyze literary elements in short stories, essays, novels, and plays. Students will also explore the writing process through the study of grammar, usage, vocabulary, outline organization, thesis statements, drafting, and revising a five-paragraph essay.

ENGLISH 9 – This year-long course builds on students' reading and writing skills. Students will analyze different literary elements in short stories, essays, novels, and plays. Oral presentations will be prepared and performed. Students will also explore the writing process through the study of grammar, usage, vocabulary, outline organization, thesis statements, drafting, and revising a five-paragraph essay.

(H) ENGLISH 9 - Students who are reading and writing at advanced levels will be reading, responding to, and discussing novels, poetry, short stories, non-fiction essays, technical material, plays, and speeches. This course will reinforce students' advanced writing skills and enhance their logical thinking. Students will justify valid thesis statements with cogent discussion of facts from quality sources, with citations, through both written and oral presentations to audiences inside and outside of the school.

ENGLISH 10 - Students will read fiction and non-fiction for insight into the human experience and cultural awareness. Classic and contemporary literature will provide students diverse opportunities for study and evaluation. Students will refine the writing process, begin the formal research process, and learn strategies to become more coherent and precise thinkers and writers.

(H) ENGLISH 10 - Students who are reading and writing at advanced levels will be reading, responding to, and discussing novels, poetry, short stories, non-fiction essays, technical material, plays, and speeches. This course will reinforce students' advanced writing skills and enhance their logical thinking. This honors course provides students with an intensive study of grammar and mechanics which are then applied to paragraph, essay, report, and research writing. Many oral presentations are required. The course is designed for college-bound students.

DRAMA I - An introduction to all aspects of the theater world. Students will act, design, learn theater history, and apply makeup. \$25 course fee

DRAMA II - An advanced study in theater. Students will research theater history, participate in advanced actor training, and write and produce plays.

DRAMA III - This class offers students the opportunity to earn college credit; see page 3 for more details. This is an intensive course in theater production, specifically acting. Students will be instructed in advanced acting skills as well as auditioning, improvisation, playwriting, direction, and dramatic literature. Drama III will emphasize instruction for post-secondary work in community theater and collegiate theater. Students will be expected to participate in all productions. Students taking the course must remain in the course for a full semester to earn senior English credit.

(H)SPEECH - This course introduces students to the principles of speaking and listening theories and techniques. The purpose of this course is to enable students to better understand the theories and practices of speaking and listening. Through this course, students will develop the skills necessary to critically evaluate the written and spoken speeches of others while also developing speech-writing and delivery skills.

AMERICAN LITERATURE AND ARGUMENT - This class offers students the opportunity to earn college credit; see page 3 for details. Focused on fiction and non-fiction within American literature, this course will allow students to discover the humanity in the writing and events that shaped our nation's history. The course provides students with an opportunity to practice and refine the writing and research processes. It further involves students in critical analysis, oral and written presentations, and the study of grammar, usage, and vocabulary.

AP LANGUAGE AND COMPOSITION - This class offers students the opportunity to earn college credit and an AP designation on their transcript; see page 3 for details. An expectation of this course is that the students have advanced composition and literary interests and skills. Focused on fiction and non-fiction within American literature, this course is designed for juniors and seniors who want to challenge themselves and discover the humanity in the writing and events that shaped our nation's history. The course provides students with an opportunity to practice and refine the writing and research processes. It further involves students in critical analysis, oral and written presentations, and the study of grammar, usage, and vocabulary.

ENGLISH 11 - This Career Preparedness Pathway English course will develop student success by providing the communication skills students need to be successful within their personal and professional relationships when they enter the skilled workforce. This course will encourage students to read and write analytically using literature as well as non-fiction essays, provide career knowledge, adapt the writing process through various hands-on projects, and develop 21st Century communication skills.

WORLD LITERATURE - This class offers juniors and seniors the opportunity to earn college credit; see page 3 for more details. A study of works of world literature. The course emphasizes the study and consideration of the literary, cultural, and human significance of selected great works of the world's literary traditions. An important goal of the class is to promote an understanding of the works in their cultural/historical contexts and of the enduring human values which unite the different literary traditions. The course gives special attention to critical thinking and writing within a framework of cultural diversity. Writing instruction will emphasize format, supporting content, vocabulary development, style, grammar, usage, and mechanics. Students will apply writing strategies to a variety of creative, academic, and practical assessments.

AP LITERATURE AND COMPOSITION - This class offers students the opportunity to earn college credit and an AP designation on their transcript; see page 3 for details. The class will follow the requirements set forth by AP and PCC's Literature 115. The class will cover poetry, short fiction, novels, plays, and epics. Beyond the genre requirement, AP also requires a vast time range with works from the Renaissance (specifically Shakespeare), the Victorian era, and the Modern era being covered. AP recommends the study of at least six larger works (novels, plays, epics).

ENGLISH 12 - This Career Preparedness Pathway English course will develop student success by providing the communication skills students need to be successful within their personal and professional relationships when they enter the skilled workforce. This course will encourage students to read and write analytically using literature as well as non-fiction essays, provide career knowledge, adapt the writing process through various hands-on projects, and develop 21st Century communication skills.

CREATIVE WRITING – This class offers students the opportunity to earn college credit; see page 3 for details. A cross-pathway course. This course will focus on three major genres: short stories, creative non-fiction and poetry. Students will read and analyze contemporary literature in each genre while writing their own pieces for the area studied and then participate in writer's workshop style revision to practice giving and receiving feedback for class work.

PODCASTING - This course offers students the opportunity to listen to, create, and analyze "texts" of the podcasting medium by using a creative writing workshop. Students will discuss and write about podcasting, its influences, and techniques. They will study, listen, and analyze how the layers of writing, pitching, recording, editing become the stories we hear. By merging their knowledge, creativity, and performance skills from other English classes with audio technology, students will produce their own podcasts. Students can earn a "List B" English credit from a full semester of participation in either their junior or senior year.

ANALYTICAL READING AND WRITING – This class offers students the opportunity to earn college credit; see page 3 for details. Within the fields of science, engineering, technology, business and professional occupations, students will develop abilities to organize and create manuals, journal articles, scientific data and research, and other technical publications. Students will utilize a multifaceted approach to reading and writing skills through a research-based technique within the field of analytical reading and writing.

TECHNICAL THEATER - An introduction to all aspects of technical theater. Students will learn lighting, sound, set, costume, props, and makeup design and implementation. Students will participate in the technical aspects of stage productions during class. Students can earn a “List B” English credit from a full semester of participation in either their junior or senior year.

VIDEO PRODUCTION I – An introduction to film history, video basics, editing, media and the production process. Students can earn a “List B” English credit from a full semester of participation in either their junior or senior year.

BROADCASTING - An introduction to video broadcasting, studio work, advertising, and video editing for broadcast. Students can earn a “List B” English credit from a full semester of participation in either their junior or senior year.

FILM EDITING - In this course students will learn how to film various shots and perspectives to create professional looking film. Students will also learn how to use Adobe Premiere to edit and manipulate video. Students will use techniques in media management, editing, titles, transitions, filters, and special effects to create professional looking videos.

(H) STEM Communication and Writing- This course offers students the opportunity to develop technical writing skills to prepare them for careers in Science, Technology, Engineering, and Mathematics. The curriculum will focus on stakeholder outreach, design proposals, prototyping, usability testing, and report writing. If students take this course in conjunction with Engineering and Design 3, students may be considered for exemption from first-year design courses at the Colorado School of Mines and the University of Colorado (including Western State University sponsored by CU). This course will also partner with the curriculum for Systems GO: Rockets I-III.

MATHEMATICS

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Foundations of Algebra A			9	2	Teacher approval/recommendation
Foundations of Algebra			9	2	
Algebra I Part I			9,10,11	1	
Algebra I Part II			9,10,11	1	Foundations of Algebra or Algebra I Part I
Geometry			9,10,11,12	1	Algebra I Part II
Career Math	C, X	MAT 1140*	10,11,12	1	*Concurrent Enrollment available ONLY after completion of two math courses prior to Career Math
Technical Math	C, X	MAT 1150*	10,11,12	1	*Concurrent Enrollment available ONLY after completion of two math courses prior to Technical Math
Financial Math	C	MAT 1160*	10,11,12	1	*Concurrent enrollment available ONLY after completion of two math courses prior to Career Math; Concurrent Enrollment not available at the freshmen level
Math for Liberal Arts	C	MAT 1240	11,12	1	Algebra I Part II

(H) Pre-Calculus	H		11,12	1	(H) Trigonometry
AP Calculus	H, AP		11,12	2	(H) Pre-Calculus
AP Physics	C, H, AP	PHYS 1111	10,11, 12	1	Concurrent Algebra II

NOTES:

- For all math courses, refer to the math tracks diagram for suggested prerequisites.
- All freshmen will take two math courses unless they have completed Geometry.
- For students planning to attend a Colorado 4-year college after high school, it is recommended that students should complete through Algebra II. However, some college program requirements differ. For specific academic requirements, it is advised that students contact admissions or academic advising at the institution(s) they are considering.

FOUNDATIONS OF ALGEBRA A – (Prerequisite:ILP, IEP, ELL, MTSS; Teacher approval or recommendation; Demonstrates below grade-level proficiency by most recent evaluation) This year-long, 2-credit freshman option is for students who need a slower-paced approach to the traditional Algebra I curriculum. Students will cover all of the topics covered in Algebra I Part I, with additional opportunities to revisit and expand their understanding of foundational concepts. Instruction will include the appropriate use of manipulatives, technology, and exposure to related disciplines (computer science, engineering, design, etc.) After successful completion of the course, students may go on to take Algebra I Part II or Career/Technical Math.

FOUNDATIONS OF ALGEBRA – This year-long, 2-credit freshman option is for students who need a slower-paced approach to the traditional Algebra I curriculum. Students will cover all of the topics covered in Algebra I Part I, with additional opportunities to revisit and expand their understanding of foundational concepts. Instruction will include the appropriate use of manipulatives, technology, and exposure to related disciplines (computer science, engineering, design, etc.) After successful completion of the course, students may go on to take Algebra I Part II or Career/Technical Math.

ALGEBRA I PART I - This course permits the student to master the following basic topics of algebra: signed numbers, absolute value, translation of phrases to mathematical expressions, order of operations, solving equations, linear equations, slope, x/y graphing, functions, direct variation, mathematical properties, practical applications, and communication of mathematical reasoning. Algebra I Part 1 and Algebra I Part 2 should be taken in the same school year and/or in consecutive semesters.

ALGEBRA I PART II - This course permits the student to master the following topics of algebra: algebraic fractions, ratios, proportions, inverse variations, percent, operations and factoring of polynomials, systems of equations, inequalities, radical expressions, quadratic equations, and basic trig functions. To align with standardized assessments, some concepts of this course will be developed with the use of a graphing calculator. Students will have access to graphing calculators during class time and school hours and are encouraged to have one of their own to assist in the understanding of these concepts. Algebra I Part 1 and Algebra I Part 2 should be taken in the same school year and/or in consecutive semesters.

GEOMETRY - This course involves the application of inductive and deductive reasoning. These thought processes will be applied to basic terminology, segments and angles, properties of parallel and perpendicular lines, congruent and similar triangles, properties of special quadrilaterals, polygons, right triangles, properties of circles, and area and volume of geometric solids. Incorporated throughout these sections are formal geometric proofs. This material is essential for students to advance in mathematics.

CAREER MATH A - (Prerequisite:ILP, IEP, ELL, MTSS; Teacher approval or recommendation; Demonstrates below grade-level proficiency by most recent evaluation) This year long intervention class will build a bridge between conceptual math and applied math for students who are interested in the high school to career pathway. It will relay relevant concepts that will be useful in the workplace as well as everyday life, while at the same time model and maintain the Colorado Academic Content Standards for math. Topics to be covered in this course will include: problem solving, number sense, and computation skills, measurement systems, geometry, mathematical language and symbolism and algebraic methods.

CAREER MATH – This course will build a bridge between conceptual math and applied math for students who are interested in the high school to career pathway. It will relay relevant concepts that will be useful in the workplace as well as in everyday life, while at the same time model and maintain the Colorado Academic Content Standards for math. Topics to be covered in the course will include: problem solving, number sense and computation skills, measurement systems, geometry, mathematical language and symbolism, and algebraic methods.

TECHNICAL MATH – This class is designed for students who are on a non-4-year college degree pathway who will look to attain work immediately after high school or attend a vocational or trade school. Focus will be placed on the following: practical and application math dealing with specific topics that will be useful in a workplace or in life, carpentry and mechanical math tools, geometry topics that will be useful on a plumbing, electrical, welding or carpentry work site, units of measure and measurement conversions.

FINANCIAL MATH – This class covers topics that include pricing, taxes, insurance, interest, annuities, amortization, investments using financial calculators and spreadsheets. Students in the class will use proportion, base, and rate to solve financial math applications, interpret business expense accounts, apply mathematical calculations to various investment options, apply mathematical calculations to various loan types, apply mathematical calculations to various tax and payroll scenarios.

MATH FOR LIBERAL ARTS – Develops mathematical and problem-solving skills. Appropriate technological skills are included. Contents selected highlight connections between mathematics and the society in which we live. Topics include set theory and logic, mathematical modeling, probability and statistical methods, and consumer mathematics, additional content will include one topic in geometry, numeration systems, decision theory, or management science. This course is one of the Statewide Guaranteed Transfer Courses, GT-MA1.

All of the following advanced level math courses require the student to have a graphing calculator. The math department recommends students have a TI-84 series calculator. Graphing calculators (a TI-84 Silver) are available to be rented from the CCHS Math Department on a semester basis for \$25. Before purchasing a graphing calculator, please check with your instructor as some classes may allow online graphing utilities.

ALGEBRA II - This course reviews and extends the student's understanding of the sets of numbers, open sentences, equations and inequalities in one or two variables, systems of linear open sentences, expressions, relations and functions, rational numbers and functions, quadratic equations, irrational and complex numbers, variations, logarithmic and exponential functions, basic matrix algebra, and probability/statistics.

(H) COLLEGE ALGEBRA - This course focuses on a variety of functions and the exploration of their graphs. Topics include: equations and inequalities, operations on functions, exponential and logarithmic functions, linear and nonlinear systems, and an introduction to conic sections. This course is one of the Statewide Guaranteed Transfer Courses, GT-MA1.

STATISTICS - This course will provide the student with a basic background in applied statistics. It is designed to address the needs not only of students who wish to pursue business or other technical careers, but also those who simply wish to apply their math knowledge to interesting practical problems in daily life. There are four broad conceptual themes covered including: a) exploring data through pattern analysis, b) sampling and experimentation, c) anticipating patterns through probability, and d) drawing statistical inference through estimation of population parameters.

(H) COLLEGE STATISTICS - Explores and applies data presentation and summarization, introduction to probability concepts and distributions, statistical inference --estimation, hypothesis testing, comparison of populations, correlation and regression. This course is one of the Statewide Guaranteed Transfer Courses, GT-MA1.

(AP) STATISTICS - This non-calculus statistics course introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to four broad conceptual themes: exploring data (describing patterns and departures from patterns), sampling and experimentation (planning and conducting a study), anticipating patterns (exploring random phenomena using probability and simulation), and statistical inference (estimating population parameters and testing hypotheses).

INTRO TO COMPUTER SCIENCE - Intro to Programming is all about problem-solving. Students will develop their problem-solving ability on a full set of varied programming challenges. Students will have ample opportunities to express their individuality in how they choose to meet the requirements of this course. Students work on their own projects, but the classroom develops a programming community atmosphere that encourages sharing of knowledge. Projects and assignments will be centered around math concepts taught at the algebra level. They will help solidify students' understanding of complex tasks that may have been introduced to them in a previous math course.

(AP) COMPUTER SCIENCE PRINCIPLES - This course offers a multidisciplinary approach to teaching the underlying principles of computation. The course will introduce students to the creative aspects of programming, abstractions, algorithms, large data sets, the internet, cybersecurity concerns, and computing impacts. AP Computer Science Principles also gives students the opportunity to use current technologies to create computational artifacts for both self-expression and problem solving. Together, these aspects of the course make up a rigorous and rich curriculum that aims to broaden participation in computer science.

(AP) COMPUTER SCIENCE A - The class is an introductory course in computer science. Because the design and implementation of computer programs to solve problems involve skills that are fundamental to the study of computer science, a large part of the course is built around the development of computer programs that correctly solve a given problem. These programs should be understandable, adaptable, and, when appropriate, reusable. At the same time, the design and implementation of computer programs is used as a context for introducing other important aspects of computer science including the development and analysis of algorithms, the development and use of fundamental data structures, the study of standard algorithms and typical applications, and the use of logic and formal methods. In addition, the responsible use of these systems is an integral part of the course. Students enrolled in this course will have some required summer course work. Please visit with the instructor prior to the end of school to obtain the necessary instructions and materials.

(H) TRIGONOMETRY - This is an advanced level math course and is comparable to a trig course taught in colleges and universities as it has a college level text as its curriculum base. It is strongly recommended that a student have a "B" or better in previous courses due to the rigor and depth of the content and the required commitment of time and effort on the part of the student to be successful in this course. This course will cover the concepts of trigonometric functions, circular functions and their inverses, trigonometric identities and equations, solving triangles by application of law of sines and cosines, vectors and their applications, polar coordinates, complex numbers and conic sections.

(H) PRE-CALCULUS - This course focuses on preparing students for calculus. The main concepts covered are: linear equations and curve fitting, composite and power functions, polynomial and rational functions, exponential and logarithmic functions, vectors, systems of equations, sequences, induction, matrices, analytic geometry, and limits.

(AP) CALCULUS - AP Calculus is primarily concerned with developing the student's understanding of the concepts of calculus and providing experience with its methods and applications. It is designed for mathematically-able students who have a thorough understanding of elementary functions, analytic geometry and a strong background in algebra, geometry and trigonometry. Advanced Placement course work is comparable to college/university calculus courses. The course emphasizes a multi-representational approach to calculus with concepts, results, and problems being expressed geometrically, numerically, analytically, and verbally.

(AP) PHYSICS - This course is designed to acquaint students with the language and theories of physics with emphasis on laboratory work and problem solving. It is a rigorous, comprehensive study of energy, its properties, and relationships. A few of the major topics are Newtonian mechanics (motion, forces, work, and power). These concepts and others are reviewed through laboratory, lecture, guided practice, and audio-visual aids. This course uses a digital text and virtual labs as part of the course work. It is highly recommended for students pursuing engineering, science, or medical careers. Students are required to provide a scientific calculator. This course can be applied to high school math credit requirements.

SCIENCE

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Lab Course	Year	Credit	Recommended Prerequisite
Environmental Science			♦	9	1	
(H) Integrated Science 9	H		♦	9	1	District process
Intro to Agriculture			♦	9,10,11,12	1	
Biology			♦	9,10,11,12	1	Attempted Environmental Science or Intro to Agriculture. Can opt out of Biology by passing Biomed Sci.
(H) College Biology	C, H, AP	Bio 1111	♦	10,11,12	1	(H) Chemistry and 1 credit from Biology or (H) Integrated Science
Horticulture			♦	10,11,12	1	Attempted Environmental Science and Biology or (H) Integrated Science
(H) Systems Go – PAE	H		♦	9,10,11,12	1	
(H) Systems Go – Rockets I	H		♦	10,11,12	2	
(H) Systems Go – Rockets II	H		♦	11,12	2	(H) Systems Go –Rockets I
(H) Systems Go – Rockets III	H		♦	12	2	(H) Systems Go – Rockets II
AP Physics	C, H, AP	PHYS 1111/1112	♦	10,11,12	1	Concurrent Algebra II
(H) Chemistry	C,H	CHEM 1015	♦	10,11,12	1	Completion Alg I Pt II; 2 credits from Environmental Science/Biology or 1 credit from (H) Integrated Science
AP Chemistry	C, H, AP	CHEM 1111/1112	♦	10,11,12	2	(H) Chemistry
Geology			♦	10,11,12	1	2 credits from Environmental Science/Biology or 1 credit from (H) Integrated Science
(H) College Anatomy	H, C	Bio 2101/2102	♦	10,11,12	2	College Biology
(H) Water Quality and Ecology	H	ENV 1111	♦	11,12	1	Environmental Science, Biology or (H) Integrated Science, and Algebra I part II; Recommended Chemistry
(H) Hydrology and Watersheds	H	ENV 1111	♦	11,12	1	Environmental Science, Biology or (H) Integrated Science, and Algebra I part II; Recommended Chemistry
(H) Principles of Biomedical Science	C, H	BIO 1005	♦	9,10,11,12	1	

It is recommended that students complete a minimum of one science credit each year in grades 9 and 10. Students should select a minimum of one science class each semester during grades 11 and 12 if desired. Students in grades 9 and 10 may take two science credits in the same school year if they are strong science students and have counselor approval. Students who are admitted to a four-year college or university in Colorado are encouraged to take a minimum of three years of natural science.

9th Grade Required classes-

- Environmental or
- Intro to Agriculture or
- (H) Integrated Science

****9th Graders who pass (H) Integrated science can take (H) Chemistry spring semester**

**** 9th Grade can take Principles of Biomedical during spring semester**

10th Grade Required classes-

- **Biology or**
- **Principles of Biomedical Science or have passed**
- **(H) Integrated Science meets this requirement**

ENVIRONMENTAL SCIENCE - One of the required options for 9th grade, semester-long, freshmen-level course that uses that uses concepts in ecology, geology, meteorology, biology, chemistry, engineering, and physics to study environmental problems and human impacts on the environment

(H) INTEGRATED SCIENCE 9 - This course will integrate themes of classification, energy, structures & functions and systems & interactions. It will incorporate both the standards taught in earth science and biology. It will give advanced freshmen the opportunity to complete these standards in a semester. This course provides rigor and relevance as both earth science and biology curriculum are combined.

INTRO TO AGRICULTURE: One of the required options for 9th grade. Introduction to Agriculture provides students with the opportunity to explore various aspects of the agricultural industry such as plant science, animal science, agriscience, and agribusiness. There will be many hands-on activities such as dissections, work in the greenhouse and other fieldwork.

BIOLOGY A - (Prerequisite:ILP, IEP, ELL, MTSS; Teacher approval or recommendation; Demonstrates below grade-level proficiency by most recent evaluation) Biology is designed for students who are interested in learning about living things. Students will be introduced to basic biological concepts. Characteristics of living things, basic biochemistry, cell biology, DNA, genetics, and classification are major components of the course. A field investigation will also be included in the course where major ecological principles will be explored.

BIOLOGY - Biology is designed for students who are interested in learning about living things. Students will be introduced to basic biological concepts. Characteristics of living things, basic biochemistry, cell biology, DNA, genetics, and classification are major components of the course. A field investigation will also be included in the course where major ecological principles will be explored.

(H) College Biology - This course is designed to be the equivalent of 1 semester of college introductory biology usually taken by biology majors during their first year. College Biology includes those topics regularly covered in a college biology course for majors or in the syllabus from a high-quality college program on introductory biology. It aims to provide students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology.

HORTICULTURE - An introduction course to basic horticulture practices. Students study horticultural techniques used in personal and professional cultivation practices. These include the following: aquaponic systems, hydroponic systems, and soil systems. This course will provide students with the opportunity to grow and cook their own food as well as allow them to explore various business opportunities in the realm of agriculture and horticulture.

(H) SYSTEMS GO – PAE – The first of four innovative hands-on high school science, technology, engineering and mathematics (STEM) courses that uses project-based learning to stimulate 21st Century workplace skills in: design, development, testing, analysis, critical thinking, cognitive reasoning, problem solving, innovation. Curricula covers introductions to the R&D industry and innovation; mechanical drafting/CAD for working drawings capture; and applied physics of main energy systems - mechanical, electrical, thermal, fluid - through design, build, and test projects.

(H) SYSTEMS GO – Rockets I – Students will build 3 generations of rockets while working towards their final goal of building a rocket that will travel 1 mile into the atmosphere carrying a 1 pound payload. It is the second of four innovative hands-on high school science, technology, engineering and mathematics (STEM) courses that uses project-based learning to stimulate 21st Century workplace skills in: design, development, testing, analysis, critical thinking, cognitive reasoning, problem solving, innovation. Curricula covers introductions to the R&D industry and innovation; mechanical drafting/CAD for working drawings capture; and applied physics of main energy systems - mechanical, electrical, thermal, fluid - through design, build, and test projects. While PAE is helpful it is not necessary to enroll into this class.

(H) SYSTEMS GO – Rockets II – Students will build a mathematical flight profile using EXCEL for a rocket that will break the sound barrier and travel no more than 13,000 feet into the atmosphere. They will culminate this process by briefing actual NASA scientists and then they will research and build the rocket to be launched early in the spring. It is the third of four innovative hands-on high school science, technology, engineering and mathematics (STEM) courses that uses project-based learning to stimulate 21st Century workplace skills in: design, development, testing, analysis, critical thinking, cognitive reasoning, problem solving, innovation. Curricula covers introductions to the R&D industry and innovation; mechanical drafting/CAD for working drawings capture; and applied physics of main energy systems - mechanical, electrical, thermal, fluid - through design, build, and test projects. Rockets I is a prerequisite for this class.

(H) SYSTEMS GO – Rockets III – This would be the final Systems Go class and is currently in development. Final time for Development is still up in the air. Like the other classes listed above it is a hands-on high school science, technology, engineering and mathematics (STEM) course that uses project-based learning to stimulate 21st Century workplace skills in: design, development, testing, analysis, critical thinking, cognitive reasoning, problem solving, innovation. Curricula covers introductions to the R&D industry and innovation; mechanical drafting/CAD for working drawings capture; and applied physics of main energy systems - mechanical, electrical, thermal, fluid - through design, build, and test projects.

AP PHYSICS - This course is designed to acquaint students with the language and theories of physics with emphasis on laboratory work and problem solving. It is a rigorous, comprehensive study of energy, its properties, and relationships. A few of the major topics are Newtonian mechanics (motion, forces, work, and power). These concepts and others are reviewed through laboratory, lecture, guided practice, and audio-visual aids. This course uses a digital text and virtual labs as part of the course work. It is highly recommended for students pursuing engineering, science, or medical careers. This concurrent enrollment course (Phys 111) can help meet one of the required physics credits for life science majors in college. Students are required to provide a scientific calculator. This course can be applied to high school math credit requirements.

(H) CHEMISTRY - This course is designed to improve students' thinking skills and understanding of the strong relationship between mathematics and science. It is a rigorous, comprehensive study of matter, its properties, and relationships. Problem solving and laboratory activities are emphasized. The basic theories of chemistry, use of laboratory equipment, and metric measurement are stressed. A few of the major topics are atomic structure, periodic law, chemical bonding & nomenclature, states of matter, stoichiometry, acids & bases, and chemical equilibrium. These concepts and others are reviewed through laboratory, lecture, guided practice, and audio-visual aids. (H) Chemistry is a college preparatory course; it is highly recommended for students pursuing science, engineering, or medical careers. Students are required to provide a scientific calculator.

(AP) CHEMISTRY - This course is designed to give students greater depth in the theories of chemistry with emphasis on laboratory work. It is a rigorous, comprehensive study of matter, its properties, and relationships. A few of the major topics are electrochemistry, kinetics, thermodynamics, colligative properties, and solubility equilibria. This course has a significant amount of problem solving and is designed to prepare students to take the AP Chemistry exam. It is highly recommended for students pursuing engineering, science, or medical careers. Students are expected to pay and take the Advancement Placement examination (approximate cost \$85 per exam.) Students who sign up to take the AP test and decide not to test will be charged the current College Board required processing fee. Only students who take the AP exam will have 'AP' notated on their transcript for the course. Students are required to provide a scientific calculator. This concurrent enrollment course meets part of the expectations for the chemistry requirements most life science majors will need.

GEOLOGY - The spectacular eruption of a volcano, the terror wrought by an earthquake, the magnificent scenery of a mountain valley, and the destruction created by a landslide are all subjects covered in geology. Geology will expand upon the physical world where EARTH and SKY left off. The Cañon City area is rich in geologic events, history, and landforms. This class will explain local features by relating them to global events and history. Geology is designed for the student who shows an interest in the physical world and a curiosity as to why the world looks the way it does. Extensive use of field trips, labs, PowerPoints, and hands-on demonstrations are used to cover course material. Local resources will be used as references such as Tunnel Drive and Garden Park. Several walking trips to the Hogbacks and field trips to other local geologic areas provide outdoor, hands-on experiences in geology. Students need to be able to walk up to two miles.

(H) College Anatomy - A concurrent enrollment course in which students examine the interactions of body systems as they explore, identify, communicate, power, movement, protection, and homeostasis. Students design experiments, investigate the structures and functions of the human body and use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration. Exploring science in action, students build organs and tissues on a skeletal manikin, work through interesting real-world cases, and often play the role of biomedical professionals to solve medical mysteries.

(H) WATER QUALITY AND ECOLOGY - This course is an introduction to water quality and riparian (i.e. near river) ecology. This is a hands-on course; students are required to participate in field science data collection on a regular (1-2x per month) basis. The biological, physical, and chemical data conducted by students (via the Colorado River Watch Program) are used to inform decisions made by the State of Colorado and the EPA. Students will also learn about the Clean Water Act as well as water pollution sources and issues. Students who take this course will leave with the skillsets of water quality data collection, the understanding of ecological impacts and relationships, and the ability to consider how water quality influences/impacts riparian ecology. Students that take this class have the option to earn a River Watch of Colorado Certification, which is recognized by the CO Dept. of Education and various State and local employers.

(H) HYDROLOGY AND WATERSHEDS - This course is an introduction to hydrology and watersheds via lab science, field science, and direct instruction. We will explore the occurrence, distribution, movement, and properties of water as well as water's relationship with the natural environment and human impact. The first half of the semester will focus on the physical properties of water including the hydrologic cycle, precipitation, streamflow, watersheds, groundwater, and hydraulics. The second half of the semester will be dedicated to applying this knowledge and building skill sets in the field. We will explore the many issues we face in Colorado such as climate, fire, flood, and drought;

we will also examine how we can face these challenges through land and water management, policy, and the development of restoration projects. Students that take this class have the option to earn a River Science Certification, which is recognized by the CO Dept. of Education and various State and local employers.

(H) PRINCIPLES OF BIOMEDICAL SCIENCE - A course designed to immerse students in the high paced study of biomedical science. Forensics, Nursing, Diseases, and Engineering are all covered over the semester. This course can be taken in replacement of biology.

SOCIAL STUDIES

WORLD GEOGRAPHY A- (Prerequisite:ILP, IEP,, ELL, MTSS; Teacher approval or recommendation; Demonstrates below grade-level proficiency by most recent evaluation) Geography is a course about the earth and the relationships and distribution of its people and resources. Basic concepts of geography and the use of essential tools and skills will be introduced. The interaction between humans and the physical environment will be emphasized for the regions of the USA, Canada, Latin America, Europe, Northern Eurasia, Africa, Middle East, Asia and Oceania. Global perspectives and problems will be studied through cultural, economic, historic, political and urban geography.

WORLD GEOGRAPHY – Geography is a course about the earth and the relationships and distribution of its people and resources. Basic concepts of geography and the use of essential tools and skills will be introduced. The interaction between humans and the physical environment will be emphasized for the regions of the USA, Canada, Latin America, Europe, Northern Eurasia, Africa, Middle East, Asia and Oceania. Global perspectives and problems will be studied through cultural, economic, historic, political and urban geography.

WORLD HISTORY - This class studies the history of mankind and the human impact on the world. The course traces mankind's journey through ancient civilizations to the modern world and helps students create solutions to today's issues through a better understanding of the past.

AP EUROPEAN HISTORY – In this course, students will investigate significant events, individuals, developments, and processes from approximately 1450 to the present. Students develop and use the same skills and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change.

COLORADO HISTORY - Students in this elective history course will use primary and secondary documents to unfold the story of the Centennial State including its earliest Native Americans, the Spanish explorers and settlers, the mountain men and gold rush participants, the railroad age, the diverse agricultural interests, the importance of tourism, and the future needs and challenges.

(H) COLORADO HISTORY - This college-level course presents the people, society, and cultures of Colorado from its earliest Native Americans, through the Spanish influx, the explorers, the mountain men, the gold rush, railroad builders, the cattlemen and farmers, the silver boom, the tourists, and the modern state. Throughout the course, students will use primary and secondary source material to investigate the history of Cañon City and Fremont County and determine how our local history was affected by state and national movements and events. This course uses a college-level text.

INTERNATIONAL RELATIONS - This course is designed to provide students with an understanding of the foundations and theories underlying international relations in the 21st Century. Major topics include diplomacy, globalization, international intervention, global security and what it means and takes to be a global citizen in the 21st century.

U.S. HISTORY - Students will study major eras of 20th and 21st century American history such as WWI, WWII, the Cold War era, and recent history, depending on each year's focus and theme.

(H) U.S. HISTORY - This college-level course explores events, trends, peoples, groups, cultures, ideas and institutions in United States history including the multiple perspectives of gender, class and ethnicity between the period of the American Civil War and the present. It focuses on developing, practicing and strengthening the skills historians use while constructing knowledge in the discipline.

PSYCHOLOGY - The scientific study of behavior including motivation, emotion, physiology, psychology, stress and coping, research methods, consciousness, sensation, perception, learning, and memory.

AP PSYCHOLOGY - The primary goal of this course is to increase the understanding of psychology, its methods, theory, and research, with the objective that each student pass the AP Psychology Exam. All concepts outlined in the Advanced Placement Psychology Course Description will be covered. Concepts include scientific foundations of psychology, biological bases of behavior, sensation, perception, learning, cognitive psychology, developmental psychology, motivation, emotion, personality, clinical psychology, and social psychology.

(AP) ART HISTORY - This is a college level survey course of art history from cave paintings to the 21st Century. The focus of study is on painting, sculpture and architecture. Slides, lectures, films, and a visit to the Denver Art Museum are part of this course. Participants are expected to take the AP Art History examination in May.

AMERICAN GOVERNMENT - This course presents a study of the United States governmental system in terms of function, history, and philosophy with additional emphasis placed on civic responsibility, political parties, individual rights, comparative political systems, economics, and personal finance literacy.

AP GOVERNMENT AND POLITICS - This course is a college-level, nonpartisan introduction to key political concepts, ideas, institutions, policies, interactions, roles, and behaviors that characterize the constitutional system and political culture of the United States. Students will analyze and study US foundational documents, supreme court decisions, and other texts to understand the relationships and interactions among political institutions, processes, and behavior.

PaICE (Professional and Internship Community Experience) – Internship			11,12	1	Juniors or Seniors ONLY

COMPUTER APPLICATIONS - (*Prerequisite: Required Freshman course*) Most of you have, or will use a computer – but do you really know how to make it work for **YOU**? Computer Applications is the place to bring it all together. After completing this course, you will gain real world experience with some of the most widely used business applications. Learn personal finance and business concepts through use of Microsoft Office and Google Apps.

COMPUTER APPLICATIONS II - Whether you are college bound or entering the business world, Computer Applications 2 will provide the necessary skills. Learn advanced features and develop proficiency in the integration of the Microsoft Office Suite (*Word, Excel, Access, PowerPoint, Publisher and PC Basics*). Students will complete a variety of required and personal projects for each software application. Students will have the opportunity to earn credits under the Dual Credit Program through Pueblo Community College, Fremont Campus.

(H) COMPUTER APPLICATIONS III - WORD - Prepare for the Microsoft Office Specialist certification in Word through coursework, projects and simulations.

(H) COMPUTER APPLICATIONS III - EXCEL - Prepare for the Microsoft Office Specialist certification in Excel through coursework, projects and simulations.

PERSONAL FINANCE - Money, money, money!!! Budgets, payroll, banking, and personal business tasks—I know these things are in my future, but what are they? Apply *real-life* personal business tasks with checkbooks, credit cards, savings, and other money management tools. Learn how to be a wise consumer and make your future *financially* successful by entering the “real world” through Personal Finance!

PERSONAL FINANCE II - Provides an in depth dive into issues related to Personal Finance including: investing, paying for college, insurance, income and taxes, consumer awareness and real estate. Students can form financial goals and action plans for their life in high school, college and beyond.

BUSINESS MANAGEMENT AND LAW - Learn how to start your own business and what responsibilities you will have as a business owner. Gain critical knowledge about your rights and responsibilities within our legal environment. Prepare and certify in Entrepreneurship and Small Business.

ACCOUNTING I – Basic money knowledge is a **MUST**, whether you are heading for college or entering the business world! Every person and business has to keep records of their daily activities. Apply accounting concepts with real job situations through automated software and simulations. Students will have the opportunity to earn credits under the Dual Credit Program through Pueblo Community College, Fremont Campus. Gain a whole new perspective on financial management!

(H) ACCOUNTING II - Expand on your knowledge in Accounting I and prepare yourself for college and a professional job in accounting. Make the transition from high school accounting to college accounting smooth and easy. Prepare for the QuickBooks Certified User licensing.

SOCIAL MEDIA MARKETING - Social media is at the forefront of your culture. Be a content creator! Use these tools for free advertising and capitalize on user created content as essential components in today’s digital marketplace.

DIGITAL PHOTOGRAPHY - Provides an overview of Digital Photography and its role in society. This course emphasizes terminology and the identification of camera components and software used in photo and video editing. We will train on the use and care of professional cameras and equipment.

DIGITAL GRAPHIC DESIGN - Digital Graphic Design emphasizes the computer as a creative tool for students who wish to explore the graphic design potential of a computer.. Learn the creative use of graphic tools, typography, layout and design, and the production of graphic publications. Students will use the Adobe Creative Suite (*Photoshop, Illustrator, and Animation*) to create professional graphic design projects. Students will have the opportunity to earn credits under the Dual Credit Program through Pueblo Community College, Fremont Campus. Show off your creativity through these graphic design tools.

(H) DIGITAL GRAPHIC DESIGN II - Continue exploring your creativity and professionalism in digital graphic design. Prepare for the Adobe Certified Associate license in Photoshop or Illustrator through coursework, projects and simulations.

WEB DESIGN - Knowing how to communicate effectively through web and media technology is the key to success in the 21st Century. Learn to customize animation, music, video, graphics, and text for web applications using software such as Photoshop, Dreamweaver and more! Master these components of multimedia in your own web designs! Students will have the opportunity to earn credits under the Dual Credit Program through Pueblo Community College, Fremont Campus.

INTRO TO GAME DESIGN - Take on the role of game designer, creative director, graphic designer, and game tester in planning, assembling, and marketing a video game using the tools learned throughout the course. Learn the fundamentals of 2D and 3D games, and what the key differences are between the two. Learn the basics of C# coding, which is used to make basic systems for games.

(H) ADVANCED GAME DESIGN – Students will expand upon their foundation established in Intro to Game Design where they will build their own world through asset creation, texture building and 3D rendering. Expand on and create new systems for gameplay using C# code.

COMPUTER INFORMATION SYSTEMS – Students will learn how to plan, purchase and set-up technology in professional settings. Provides an overview of computer information systems and their role in society. This course emphasizes terminology and the identification of computer components and systems used in personal and business environments. This course discusses the evaluation of systems and measures that can be applied to protect them.

A+ I - HARDWARE – Students will gain experience installing, managing, repairing and troubleshooting PC hardware. Students taking this course and A+ II - Software have the opportunity to become CompTIA A+ certified professionals and be able to troubleshoot and problem solve core service and support computer challenges while applying best practices for documentation, change management and scripting.

A+ II - SOFTWARE - Students will gain experience installing, managing, repairing and troubleshooting operating systems and PC software. Students taking this course and A+ I - Network have the opportunity to become CompTIA A+ certified professionals and be able to troubleshoot and problem solve core service and support computer challenges while applying best practices for documentation, change management and scripting.

A+ HARDWARE REPAIR - Students will gain experience installing, managing, repairing and troubleshooting District Chromebooks. Students taking this course will strictly work on the repair aspect of the Chromebooks with only an introductory review of the CompTIA A+ standards and processes. The environment will mirror that of a Technology business with duties assigned for product order, work process management, repair and customer service.

NETWORK +; NETWORKING FUNDAMENTALS I – Students will learn real world skills in the rapidly growing career fields of Networking and Cybersecurity where they will build their own network and be a part of the future.

NETWORK +; NETWORKING FUNDAMENTALS II – Students will continue learning real-world skills in the rapidly growing career fields of Networking and Cybersecurity where they will build their own network and be a part of the future.

CAPSTONE – Students will prepare for and schedule their Capstone final evaluation and complete the remaining items in their Capstone Graduation Portfolio. The grade in this class is directly related to the outcome of the Capstone final evaluation. It will either be a “Fail,” “Pass,” or “Pass with Honors credit.”

TIGER DEN SCHOOL STORE - Tiger Den students manage the school store, create items for the online store, and complete publishing projects for the school and community. Students can also participate in managing the Tiger Den as part of the PaICE internship program.

TIGER PRODUCTION - Students supply and run a school manufacturing business. Students learn and apply fundamental aspects of product design, manufacturing and marketing. Students develop relationships with local consumers and businesses, research their needs, and then design and produce products to meet market demand. Students get hands-on manufacturing experience and develop employable skills using the laser etcher, UV printer, cnc router, and laser cutter.

PROFESSIONAL AND INTERNSHIP COMMUNITY EXPERIENCE (PaICE) Work Study and Internship - Participate in an internship and earn a scholarship or work for pay as a working student and earn credit! This cooperative work-based learning program gives students a chance to gain first-hand experience in a career interest area and gain confidence in their abilities. Students may set up their schedule for PaICE in a variety of ways. Ultimately, students earn credit for working, gain skills and experience, and learn how to balance school and work! Students may enter PaICE at the start of any quarter.

Business Technology Licenses

The Business Technology Department offers the following areas of industry standard licensing which students can earn by enrolling in the following business courses and successfully completing licensing exams:

Required Course: Computer Applications/Business Applications Recommended Courses: Personal Finance, Career and College Prep		
Licensed Expert: Adobe ♦ Digital Graphic Design ♦ (H) Digital Graphic Design II	Licensed Expert: Microsoft Office ♦ Computer Applications II ♦ (H) Computer Applications III ♦ (H) Computer Applications IV	Licensed Expert: QuickBooks ♦ Accounting I ♦ (H) Accounting II
Small Business Management ♦ Business Management and Law ♦ Personal Finance	Unity Certified User ♦ Intro to Game Design ♦ Advanced Game Design	CompTia A+ Certification ♦ A+ I - Hardware ♦ A+ II - Software
CompTia Network+ + Certification ♦ Network +; Networking Fundamentals I ♦ Network +; Networking Fundamentals II		

FAMILY AND CONSUMER SCIENCE

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Sewing			9,10,11,12	.5	Course fee applicable
Fashion Design			9,10,11,12	.5	
Relationships			10,11,12	1	
Child Development	C	PSY 2441	10,11,12	1	
Human Growth & Development	C	PSY 2440	11,12	1	
Culinary Nutrition			9,10,11,12	1	Course fee applicable
Culinary Arts			9,10,11,12	1	Course fee applicable
ProStart I	C	CUA 1001 HOS 1005	10,11,12	1	Culinary Nutrition and Culinary Arts; application approval; sophomores, juniors & seniors only; course fee applicable
ProStart II	C	CUA 1025	10,11,12	1	ProStart I; Culinary Nutrition and/or Culinary Arts; application approval; sophomores, juniors & seniors only; course fee applicable
Catering	C		11, 12	1	ProStart I & II or teacher approval ; course fee applicable
(H) Teacher Cadet I	H, C	EDU 2021	11,12	1	Juniors or seniors only; application approval
(H) Teacher Cadet II	H, C	EDU 2021	12	1	Teacher Cadet I; seniors only; application approval
Graduate Life Skills			10,11,12	1	Course fee applicable

SEWING – This class is designed for students who are interested in learning how to hand sew and use a sewing machine. We will be constructing at least 2 projects to introduce you to the basic elements of sewing. Students will be responsible for the cost of their chosen fabric (which at least will run each student \$5 - \$20 depending on the project chosen by the student). Students will also have to pay a \$20 deposit for a box of sewing supplies, along with a general lab fee of \$10.

FASHION DESIGN – This course is designed for students who have an interest in the fashion industry. The course will explore the principles and elements of design as well as fashion trends, cost, history of fashion and fashion designers. Students will be designing a collection of 4 outfits to prove their understanding of the elements of design as well as cost out production, create a marketing strategy and map out their customers. Students will not learn how to sew in this class but will instead create a mini version of their outfit on a Barbie. The goal is for each student to have more knowledge about the design process, elements of design and body types they will be designing for.

RELATIONSHIPS – If you are interested in a career as a psychologist, social worker, or therapist this course will help you achieve that goal. Our relationships have a huge impact on our lives. In order to have successful relationships, many important skills are needed. Relationships is a course designed for those interested in learning about effective strategies for improving interpersonal relationship skills within friendships, opposite sex relationships, and family relationships. Some of the topics include: self-concept, values, stress management, depression, communication, decision-making, compatibility factors, love, marital readiness, and dealing with family and individual crises.

CHILD DEVELOPMENT – Covers the growth and development of the child from conception through the elementary school years. This course emphasizes physical, cognitive, language, social and emotional domains of development as they pertain to the concept of the whole child. It also includes ways adults can provide a supportive early childhood and educational environment through teamwork and collaboration.

HUMAN GROWTH & DEVELOPMENT – Examines human development from conception through death, emphasizing physical, cognitive, emotional and psychosocial factors.

CULINARY ARTS – This course is for the student with an interest in the food industry. The focus of this course includes food safety and sanitation practices, introduction to industry equipment and practicing in a commercial kitchen. You will learn food preparation techniques and basic culinary skills which will give you an opportunity to carry-out catering jobs and hone your teamwork, communication, and customer service skills. Students will also have the opportunity to earn a ServSafe Food Handler certificate. Students will be responsible to pay a lab fee (\$25) to cover the cost of the food.

CULINARY NUTRITION - This course develops a lifelong understanding of health and nutrition food preparation techniques utilizing various resources and skills. Emphasis is placed on implementing healthy nutritional choices, preparing nutrient-dense food, nutrition in the life cycle and practicing wise consumer decisions. Students will be responsible to pay a lab fee (\$25) to cover the cost of the food prepared during lab time.

PROSTART I –This course is a school-to-career program sponsored by the National Restaurant Association. It provides training in the hospitality and foodservice industry and is specifically designed for those students with a serious desire to make a career in the industry. Opportunities to work with experts, experience paid internships, and earn college credit and scholarships will be explored. At the end of the 2-year program, students may elect to sit for the National Restaurant Association Exam. Because of the hands-on nature of this class, consistent attendance is necessary for success. Students will be responsible to pay a lab fee (\$50).

PROSTART II – This course is a continuation of the ProStart I course sponsored by the National Restaurant Association. The course builds on the ProStart 1 course and provides more in-depth training and experience in the hospitality and restaurant industry. Opportunities to work with experts, experience paid internships, and earn college credit and scholarships are an integral part of this course. At the end of the 2-year program, students may elect to sit for the National Restaurant Association Exam. Because of the hands-on nature of this class, consistent attendance is necessary for success. Students will be responsible to pay a lab fee (\$50).

CATERING- This semester program is designed for students with career interests in the food industry as well as owning their own catering business. The purpose of this course is to develop skills in quantity food preparation, safety and sanitation, planning, customer service, business plans and entrepreneurship. FCCLA is also an integral part of this course. Students will apply for their Cottage Food License. ProStart II is a prerequisite. There is a lab fee (\$50).

(H) TEACHER CADET I –The Teacher Cadet Program is an innovative approach designed to attract talented young people to the teaching profession through a challenging introduction to teaching. The program seeks to provide high school students insight into the nature of teaching, the problems of schooling, and the critical issues affecting the quality of education in America's schools. Colorado Teacher Cadets who successfully complete the full-year program are eligible to apply for college credit and field experience hour credits with several Colorado colleges. Students interested in becoming Teacher Cadets their junior or senior year need to complete an application process and meet minimum 3.0 grade requirement to be accepted into the program. It is highly recommended that students take child development and psychology before participating in this program.

(H) TEACHER CADET II - Teacher Cadet II is designed to provide additional field experience for those students who have completed the Honors Teacher Cadet course. For students who know they want to enter the education profession, this field experience will enhance their understanding of classroom instruction and the challenges facing education today. The field experience will include a minimum of 100 hours each semester of field contact time working with a mentor/clinical teacher plus 10 hours of seminar time at CCHS with the Teacher Cadet instructor. Field experience placement will consist of one site. These experiences will be documented in a culminating portfolio.

GRADUATE LIFE SKILLS - In this class we will look at basic life skills. We'll focus on basic hand sewing, dorm recipes, crock pot recipes, budgeting for groceries, meal planning, reading a nutrition label, basic car maintenance, renters rights, how to buy a house, which retirement options would be best for your job, how to make a budget, a stock market simulation, how health insurance works, buying a car, selling a car, good apps to download, how to get a job, what happens when you become unemployed, the cost of having children and helpful ways to communicate with employers and loved ones.

ARMY JUNIOR ROTC LEADERSHIP EDUCATION TRAINING (AJROTC) PROGRAM

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
AJROTC I			9,10,11,12	1	
AJROTC II			10,11,12	1	AJROTC I
AJROTC III			10,11,12	1	AJROTC II
AJROTC IV			10,11,12	1	AJROTC III
AJROTC V			11,12	1	Instructor recommendation
AJROTC VI			11,12	1	Instructor recommendation
AJROTC VII			12	1	Instructor recommendation
AJROTC VIII			12	1	Instructor recommendation
AJROTC Specials – Air Rifle Marksmanship			9,10,11,12	.5	
AJROTC Specials – Color Guard/Drill Team			9,10,11,12	.5	
AJROTC Specials - RAIDERS			9,10,11,12	.5	

AJROTC is not a recruiting tool for the military or Senior ROTC.

This AJROTC Program is designed to teach high school students the value of citizenship, leadership, service to community, personal responsibility, and a sense of accomplishment while instilling in them self-esteem, teamwork, and self-discipline. Its focus is reflected in its mission statement, **“To motivate young people to be better citizens.”** It prepares high school students for responsible leadership roles while making them aware of their rights, responsibilities, and privileges as American citizens. The program is a stimulus for promoting graduation from high school, and it provides rewarding opportunities that will benefit the student, community, and nation. The AJROTC program is a cooperative effort on the part of the Department of the Army and Cañon City High School.

Satisfactory completion of the program can lead to advanced placement credit in the Senior ROTC program or advanced rank in the Armed Forces. AJROTC affords leadership development opportunities for all students, whether entering the workforce directly or enlisting in the military after high school, or attending college upon graduation. Our goal is to produce successful and productive adults. An organized and disciplined learning environment is AJROTC's contribution to society. Community service and self-respect are cornerstones of the AJROTC curriculum. Students will wear uniforms and follow specific grooming requirements.

AJROTC I - In this 18-week course, AJROTC I cadets learn the history, purpose and objectives of the AJROTC program. Cadets receive instruction in citizenship, drill and ceremonies, rank and structure, personal appearance and Army uniforms, leadership theory, self-awareness and learning styles, communication skills, and conflict resolution. Emphasis is placed on self-evaluation, goal setting, teamwork, organization, and life skills development. This course is a prerequisite for AJROTC II.

AJROTC II - This 18-week course is designed to increase the cadet's leadership ability through study and practical leadership experience. His/her ability to communicate through oral presentations will be tested. The cadet's proficiency in drill and ceremonies as a leader and follower will be increased. The cadet's knowledge of safety standards and marksmanship abilities will be improved along with a general understanding of battalion organization, staff functions and leadership theory.

AJROTC III - In this 18-week course, AJROTC III cadets increase leadership abilities through practical experience as cadet non-commissioned officers through courses such as techniques of leadership, drill and ceremonies, service learning, and applied methods of instruction. AJROTC III cadets hold the majority of a squad leader, assistant squad leader, and some platoon leadership positions and are heavily involved in the operation of the company.

AJROTC IV - In this 18-week course, AJROTC IV cadets use a self-taught, self-paced method of learning using a programmed text which contains case studies, vignettes and practical exercises. AJROTC IV cadets hold the majority of the platoon and some company leadership positions and are heavily involved in the daily operation of the cadet company.

AJROTC V - In this 18-week course, AJROTC V cadets increase their leadership abilities through practical experience as cadet commissioned officers and senior noncommissioned officers through courses such as techniques of leadership, drill and ceremonies, service learning projects, and applied methods of instruction. AJROTC V cadets hold the majority of the company and some of the battalion junior leadership positions and are heavily involved in the daily operation of the cadet company and battalion. Cadets should seek instructor recommendation.

AJROTC VI - In this 18-week course, AJROTC VI cadets increase their leadership abilities through practical experience as cadet commissioned officers and senior noncommissioned officers through courses such as techniques of leadership, drill and ceremonies, service learning projects, and applied methods of instruction. AJROTC VI cadets hold the majority of the battalion staff positions and are heavily involved in the daily operation of the cadet battalion. Cadets should seek instructor recommendation.

AJROTC VII / VIII - In this 18-week course, the primary emphasis in these AJROTC levels is placed on the practical application of the cadet's acquired leadership and organizational skills as instructional aides in all AJROTC courses. Therefore, the semester is structured to allow cadets to perform their assigned command and staff duties and assistant instructor duties within the total range of the AJROTC program. AJROTC VII and VIII cadets are facilitators for the service learning projects. They are required to complete a journal, write a senior paper, and report on service learning activities. AJROTC VII-VIII cadets hold battalion leadership positions and are heavily involved in the operation of the battalion. Cadets should seek instructor recommendation.

AJROTC SPECIALS

These are quarter-long courses designed to improve the knowledge and performance of those students who are interested in joining the AJROTC Air Rifle, Drill, and Raider Teams. These classes may be taken as many times as desired by a student.

AIR RIFLE MARKSMANSHIP - Air rifle marksmanship training is provided as part of the AJROTC Specials Block. It's a three-part program that combines a basic marksmanship safety course, marksmanship training, and air rifle competition. Students participating in the AJROTC Specials Block must be enrolled in regular AJROTC class for at least one semester per academic year. The air rifle marksmanship portion of the AJROTC Specials Block is provided at no cost to the student. Cañon City High School will provide quality air rifles and all associated equipment related to the sport of 3-position air rifle shooting. Students may try out for the competitive air rifle team each fall, with a maximum of 12 shooters on the team – an extracurricular course fee will be assessed.

COLOR GUARD / DRILL TEAM - The AJROTC Color Guard is one of the most important functions of a AJROTC unit. It represents the AJROTC program and the U.S. Army to the general public. It is an honor and a privilege to be on the AJROTC Color Guard. *Students must be enrolled and participating in at least one full semester of AJROTC to be a member.* Cañon City High School Army AJROTC will always have, at a minimum, two Color Guards that are active at any given time. Color Guards are composed of a minimum of two (2) flag bearers and two (2) rifle-carrying guards. There will be special occasions when the Color Guard will utilize sabers and form what is known as the "Saber Guard". Examples of these special occasions are when the homecoming court is announced or during high school graduation ceremonies. The AJROTC Drill Team is a precision drill platoon with the primary mission of showcasing the skills of select AJROTC Cadets through precise and dynamic routines, both with and without drill rifles. *Students must be enrolled and participating in at least one full semester of AJROTC to be a member.* Cadets who choose to participate on the drill team can expect to practice several times a week; the rigors of training are continuous because the drill team is expected to execute their complicated routines as close to perfection as possible. The Drill Team consists of a Commander and 9-15 additional members. The Drill Team Cadets and their performances are one of the finest examples of what dedicated training and teamwork produces in today's AJROTC program. Both the competition Color Guard and Drill Team have the opportunity to compete against other schools and showcase their skills and dedication. In doing so, competitors can earn their varsity letter just as in any other high school athletic program. Both the Color Guard and Drill Team can assist students by:

- providing disciplinary training through instilling habits of precision and automatic response to simple commands and orders.
- increasing the confidence of young leaders through the exercise of command.
- building morale by developing team spirit and unit pride.

These teams also promote development of several core abilities, to include critical thinking and decision making; a capacity for life-long learning; communication; responsibility for decisions, actions, and choices; good citizenship; respectful treatment of others; and respectful treatment of property. Interested? Want to be part of the team? Come out and see if you have what it takes to be part of the Color Guard or Drill Team.

RAIDERS - Raiders training is provided as part of the AJROTC Specials Block. The Raider course will focus on goal-setting, the elements of health and physical fitness, team work, land navigation, first aid, knot tying, and nutrition. Students participating in the AJROTC Specials Block must be enrolled in a regular AJROTC class for at least one semester per academic year. The Raiders class portion of the AJROTC Specials Block is provided at no cost to the student. Cañon City High School will provide all associated equipment related to training and fitness. Students may try out for the Raider team – an extracurricular course fee will be assessed.

PUEBLO COMMUNITY COLLEGE (PCC)

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Intro to Auto Technology	C	ASE 1002, 1020	10,11,12	.5	Safety glasses required
Auto Technology I	C	ASE 1010, 1011, 1040, 1041, 2010, 2040, 2064, 2065, 2182	11,12	4	Instructor approval; Successful completion of Intro to Auto Technology; safety glasses required
Auto Technology II	C	ASE 1023, 1030, 1032, 1061, 1062, 2060, 2182	12	4	Instructor approval; Successfully complete Auto I; safety glasses required
Auto Technology Internship	C	ASE 2181/2182	12	1	Successfully complete Auto I and concurrently enrolled in Auto II; Coordinated by PCC Instructor and CCHS PaICE Coordinator
Human Nutrition and Health	C	HWE 100	10,11,12	.5	
Medical Terminology	C	HPR178	10,11,12	.5	
Certified Nurse Aide (CNA)	C	NUA 1001/1070	11,12	1	Biology,(H) Integrated Science, or Principle of Biomedical Science;; Suggested - Human Nutrition and Wellness AND Medical Terminology; course fee applicable
EMS 115: First Responders	C	EMS 115	10,11,12	3	Lecture Hour(s): 3
Emergency Medical Technician (EMT)	C	EMS 1021/1022/1023/124/1070	12	4	18 years of age; All current immunizations, Pass a background check and a drug screen; CPR Certified
Welding 102	C	WEL 1002	10,11,12	1	CTE Survey highly recommended-Course Fee Applicable
Welding 103	C	WEL 1003	10,11,12	1	WEL 1002; instructor approval-Course Fee Applicable
Welding 104	C	WEL 1004	11,12	1	WEL 1002/1003; instructor approval-Course Fee Applicable
Welding 106	C	WEL 1006	11,12	1	WEL 1004/2050; instructor approval-Course Fee Applicable
Welding 250	C	WEL 2050	11,12	1	WEL 1002; instructor approval-Course Fee Applicable
Intro to Fire Science	C	FST 1002/1003/1009	10,11,12	1	
Intro to Criminal Justice	C	CRJ 1010	10,11,12	1	"C" or better in American Literature & Argument or AP Language and Composition (ENG 1021); Preference given to juniors and seniors

Students will be responsible for purchasing their own materials. Take home project costs usually range from \$10-\$50, depending upon the project the student chooses to complete. All students must complete a one-time application to Pueblo Community College and complete the annual registration form to include parent signatures.

INTRODUCTION TO AUTOMOTIVE TECHNOLOGY - This is a preparatory class for Automotive Technology I and II. Basic instruction in shop safety, tool and equipment use, and electrical and different vehicle systems will be provided. Throughout the length of this quarter-long course, students will be involved in classroom discussion and hands-on shop time to work on vehicles' basic systems. Students will earn at least eight industry certifications plus the Snap-on 504 multimeter certification and four (4) college credits upon completion. **Students are to provide their own safety glasses.**

AUTO TECHNOLOGY I - This course is an in-depth study of the automobile, its systems, and repair procedures used in the automobile service industry. Systems covered are brakes, steering, suspension, electrical and HVAC. The student will complete their first internship in the second semester. This unpaid internship requires 45 contact hours with the employer and instructor. This course focuses on the principles of general vehicle maintenance. Students will learn how to perform service checks and make the necessary corrections and preventative actions. Students will be required to complete Level 1 of industry sponsored Subaru-University by the end of semester 2 and "Snap-On 504 and 525 Multi-meter" certification. They will work on mock-up vehicles. Students will earn at least 25 industry certifications and eighteen (18) college credits upon completion. **Students are to provide their own safety glasses.**

AUTO TECHNOLOGY II - This course focuses on basic and advanced automotive diagnosis and repair in areas such as engine, ignition systems, starting and charging system and the electrical system. Students will be required to complete Level 2 of industry sponsored Subaru-University by the end of semester 2, "Snap-On 504 and 525 Multi-meter" certification. Tasks will be performed on mock-up vehicles. Students will earn at least 25 industry certifications and eighteen (15) college credits upon completion. Upon completion of the program, students should have job entry skills for employment in the automotive industry. **Students are to provide their own safety glasses.**

AUTO TECHNOLOGY INTERNSHIP (ASE 2081 & 2082) – This course emphasizes practical on-the-job, work-related experience that corresponds to the area of study. In this semester, the student will take all related sponsor requirements in Service Training Standards (STS) or others as required by the program track. This unpaid internship requires 45 contact hours with the employer and instructor. Students will earn at least two industry certifications and fifteen (15) college credits upon completion. **Students are to provide their own safety glasses.**

HUMAN NUTRITION AND HEALTH - This course introduces the basic principles of nutrition with an emphasis on personal nutrition. Students in this course will study health and fitness in the US today looking at personal health issues, managing stress, nutrition and health lifestyles.

MEDICAL TERMINOLOGY - This course introduces the student to the structure of medical terms with emphasis on using and combining the most common prefixes, roots and suffixes. Includes terms related to major body systems, oncology and psychiatry, as well as clinical laboratory and diagnostic procedures and imaging. Class structure provides accepted pronunciation of terms and relative use in the healthcare setting.

CERTIFIED NURSE AIDE HEALTH CARE SKILLS (CNA) – This course prepares the student to perform the fundamental skills of the nurse aide. Basic nursing skills, restorative services, personal care skills, and safety and emergency care issues are covered in theory and lab. For successful completion of the Certified Nursing Program students must complete 40 clinical hours in a patient care setting in addition to their class time. This course requires a mandatory parent, student, and instructor meeting prior to classes beginning.

EMS 115: FIRST RESPONDERS - Provides the student with core knowledge and skills to function in the capacity of a first responder arriving at the scene of an emergency, providing supportive care until advanced EMS help arrives.

EMERGENCY MEDICAL TECHNICIAN (EMT) – CCHS is offering the opportunity to take an 18-credit hour Emergency Medical Technician certification curriculum with Pueblo Community College-Fremont Campus to qualified and committed students. The EMS program prepares you for a career in the pre-hospital health care field as an EMT. Career opportunities include ambulance service, fire service, tactical EMS, critical care transport, and emergency department technician. **Program Entrance Requirements:** To enroll in all EMS programs, you must be at least 18 years of age, have all current immunizations, pass a background check and a drug screen and be able to meet the requirements of the Functional EMS Job Description. This course will be taught entirely on the PCC-F campus and primarily in the evenings, so self-transportation is required. **Prerequisite Courses for Program**

Admission: Student must have a current Health Care Professional CPR card, successful completion of English 10, and qualifying placement scores. See your counselor to see if you qualify.

WELDING 102 - Introduces safety inspections, minor repairs, operating parameters, oxyacetylene welding equipment, and oxyacetylene welding. Blueprint reading skills will be practiced in this course. The students will weld in the 1G (Flat) position only using E6010, E6013 & E7018 electrodes. The students will also learn how to weld open roots, a pipe welding technique.

WELDING 103 - Covers performing safety inspections, making minor repairs, adjusting operating parameters, and operating SMAW equipment utilizing E6010 & E7018 electrodes. Layout procedures and practices will be used during this course. The students will weld in the 2G (Horizontal) and 3G (Vertical) positions. The students will also do open roots in the 2G & 3G positions. The students will also learn advanced weld symbols.

WELDING 104 - Covers performing advanced safety operations & inspections, making major repairs, adjusting operating parameters, and operating SMAW equipment using the E6010 & E7018 electrodes. The students will weld in the 2G, 3G & 4G (overhead) positions. The students will also weld open roots in the 2G, 3G & 4G positions. Advanced blueprint reading & weld symbols will be utilized in this class. Upon completion of the Welding 102, Welding 103 & Welding 104 classes the students will earn a certificate (Structural Welding Introduction).

WELDING 106 – Covers interpreting weld symbols on blueprints, identifying proper layout methods and tools, and proper joint design necessary for various welding processes.

WELDING 250 - Develops welding and associated skills in the use of drawings and blueprints in planning. Includes designing and layout projects. The students will be assigned four (4) projects to complete.

FIRE SCIENCE – This course introduces the fire service organization and operation from past to present operations. The course also includes operation and organization of federal, state, local and private protection forces. It also emphasizes extinguishing methods and equipment, special extinguishing agents, and special hazard considerations. The class also focuses on on-scene and on-the-job firefighter health, safety and fitness, the safety officer, mental well-being, stress management, and standards related to health, safety and fitness. Firefighting strategy and tactics, methods of fire attack, fire behavior, building construction, and pre-fire planning will be discussed. Pueblo Community College instructors will teach this class at Cañon City High School.

INTRO TO CRIMINAL JUSTICE – Introduces students to the basic components of the criminal justice system in the United States. Concepts of crime, crime data, victimization, perspectives and views of crime, theory, and law, are discussed. Particular attention to the criminal justice process, interaction and conflict between criminal justice agencies and current criminal justice issues are examined. This course may be taught on the PCC campus or at CCHS and is usually taught on Friday afternoons.

SKILLED TRADES

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Required Prerequisite
Survey - Auto			9	.5	Course fee applicable
Survey - Welding			9	.5	Course fee applicable
Woods I			9,10,11,12	.5	Course fee applicable
Woods II			9,10,11,12	.5	Pass Woods I; course fee applicable
Carpentry I	C	CAR 1003, 1005, 1021, 1022, 1023, & 1070	10,11,12	4	Instructor Approval; prerequisites: Woods I and Woods II
Carpentry II	C	CAR 1003, 1005, 1021, 1022, 1023, & 1070	11,12	4	Instructor Approval; suggested prerequisite: Carpentry I
Machine Shop			9,10,11,12	.5	
Precision Machining I	C	MAC 1005	10,11,12	1	Machine shop; instructor approval
Precision Machining II	C	MAC 1005	11,12	1	Precision Machining I; instructor approval
Engineering Design I	C	CAD 1101/1102/2455	10	1	By invitation only; course fee applicable
Engineering Design II	C	AEC 1231 & 1200; CAD 2455	10, 11	1	E&D I; Course fee applicable
(H) Engineering Design III	H, C	CAD 2456; EGT 2200 & 2202	11, 12	1	E&D II: Course fee applicable
(H) Engineering Projects	H, C	CAD 2089	11,12	1	ONE of the following - Algebra II, Engineering and Design II, Precision Machining, Systems Go, Tiger Productions; course fee applicable

SURVEY - AUTO - The auto survey course will provide students with an introductory experience in automotive technology. Students will participate in hands-on activities (such as maintaining a vehicle) and learn about career opportunities within the automotive industry through guest speakers or upper-class interaction.

SURVEY - WELDING - The welding survey course will provide students with an introductory experience in welding. Students will participate in hands-on activities (such as grinding metal) and learn about career opportunities within the welding industry through guest speakers or upper-class interaction.

WOODS I - Introduces basic squaring procedures and the beginning of basic woodworking through the assembly of a small bookshelf. Students will be responsible for purchasing their own materials. Take home project costs usually range from \$10-\$50 depending upon the project the student chooses to complete.

WOODS II - Teaches advanced cabinetry and squaring procedures as well as basic lathe use through the assembly of a bedside table with a drawer. Students will be responsible for purchasing their own materials. Take home project costs usually range from \$10-\$50 depending upon the project the student chooses to complete.

CARPENTRY I - **prerequisites - Woods I and Woods II.** Teaches the basics of homebuilding as well as jobsite introduction and basic hand tool use.

CARPENTRY II - Teaches advanced home building techniques as well as leadership roles by leading their own crew on the jobsite through the entire home building process. 10 college credits will be earned upon completion of class.

MACHINE SHOP - Teaches introductory use of manually operated lathes and milling machines to make the required project.

PRECISION MACHINING I - Teaches advanced turning and milling practices through the creation of required projects. CNC milling and turning are introduced.

PRECISION MACHINING II - Teaches advanced turning and milling practices through the creation of required projects. Beginning CNC milling and turning, CAM programming, and operation are taught.

COMPUTER AIDED DRAFTING (CAD) - This course is designed to give students the basic print reading and technical drawing skill necessary for understanding and developing working drawings used during vocational training. Computer Aided Drafting is recommended for trades and industry vocational students. This course is worth 3 college credits (CAD 101)

ENGINEERING and DESIGN NOTE:

Considered a premiere design program in the state, this ***nationally recognized and nationally certified 3 semester program*** is designed to develop in-demand 21st century skills related to technical problem solving, computer-aided design, and creative thinking. Students that complete the program earn 24 college credits, 4 mini-certifications granted by PCC, 2 Solidworks certifications, apprentice drafter certification granted by the American Design and Drafting Association, and can request to be considered for exemption from first year engineering courses at CU and Colorado School of Mines. Additionally, students can choose to fulfill their capstone requirements by taking Engineering and Design courses (E&D II or III). *(In order to receive certification, students must complete the following: "C" grade or better in the following: Algebra II; Geometry; and one of the following: Chemistry, (H) Chemistry, AP Chemistry, (H) Physics or AP Physics, (H) Engineering Projects).*

ENGINEERING and DESIGN I – prerequisite: this is an invitation only course. During this level 1 course, you will focus on employable architectural and mechanical design skills. Fundamentals of Computer Aided Design (CAD) skills will be a major focus. You will also be introduced to “design thinking” and expand problem-solving and critical thinking ability while engaging in product development, three-dimensional modeling, and layout. This course is worth 6 PCC college credits (CAD 101, CAD 102).

ENGINEERING and DESIGN II (H) – prerequisite: Engineering and Design I. During this level 2 course, you will focus on employable architectural, mechanical, and structural pre-engineering design skills. You will enhance your CAD skills in Solidworks, Revit, and Autocad. You will also use “design thinking” to identify a need, ideate solutions, and create a prototype of your product. Additionally, you will explore architectural building practices, keys to efficient home design, fundamentals of structural mechanics, design thinking, product development, and earn a professional certification in Solidworks. Additionally, by the conclusion of this course, you will have been given the option to complete and present your capstone project to meet graduation requirements. This course is worth 9 PCC college credits (AED 102, AEC 107, CAD 255).

ENGINEERING and DESIGN III (H) – prerequisite: Engineering and Design II. During this level 3 course, you will focus on applying engineering and design principles learned in previous courses. You will apply “design thinking” principles to develop and prototype innovative, novel, technical solutions to various complex social/engineering problems. You will also complete a senior design project of your choice. At conclusion of this course, you will be a certified apprentice drafter as granted by the American Design and Drafting Association. This course is also worth 9 PCC college credits (EGT 140, EGT 243, CAD 259). ***Students may choose to take this course in conjunction with (H) STEM Communication and Writing to be considered for exemption from first year engineering courses at CU and Colorado School of Mines.***

ENGINEERING PROJECTS (H) – prerequisite: ONE of the following - Engineering and Design II, Precision Machining I, Algebra II, Systems Go, Tiger Production. Students develop and apply human centered design skills and engineering problem solving skills by addressing a range of mechanical, civil, social, architectural, structural, and/or economic problems. Working primarily in teams, students research and design solutions for problems, build and test prototypes, and develop solutions to real-life problems. Students gain experience working with CAD software, hand tools, and power tools while creating functional projects. This course is worth 3 PCC college credits (EGT 143 OR EGT 140).

HEALTH, PHYSICAL EDUCATION AND RECREATION (HPER)

HEALTH, PHYSICAL EDUCATION, AND RECREATION (HPER)

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Choices			9	.5	
Body Works			9,10,11,12	.5	Course fee applicable
Foundations of Crossfit			9,10,11,12	.5	Course fee applicable
Weightlifting			9,10,11,12	.5	Course fee applicable
Intro to Sports for Life			9,10,11,12	.5	Course fee applicable
Advanced Sports for Life			9,10,11,12	.5	Course fee applicable

CHOICES - This required graduation course includes classroom lessons, guest speakers, projects and activities/discussions that encompass the importance of mental, social-emotional and physical health. Focus will be on the effects of media on health, managing stress, relationships, decision-making, substance abuse, and mindfulness.

BODY WORKS - This course will introduce students to cardiovascular workouts such as aerobics, walking/jogging, circuit training, and other aerobic activities. Topics covered in this course include healthy eating, health risk factors, components of anaerobic vs. aerobic workouts, strength training, self-defense, relaxation and stress reduction. There will be a fee for a required activity that is in our community. More information will be given in class.

FOUNDATIONS OF CROSSFIT - This course is designed to improve student fitness by utilizing the CrossFit fitness model. The course will focus on creating a positive and infectious environment where students will be motivated to improve their individual fitness levels. A \$15 fee will be assessed.

WEIGHTLIFTING AND ATHLETIC PERFORMANCE - This course is designed for those interested in lifting weights and improving their athletic performance. A variety of lifts and bodyweight movements will be incorporated into a daily workout that if performed to expectations, will improve athletic performance. All students who are involved in CCHS sports should take this class at least twice if possible.

INTRO TO SPORTS FOR LIFE - This course will consist of sports and activities that are designed to teach and promote teamwork, sportsmanship, and fair play while participating in a variety of activities that promote a healthy lifestyle. This is an entry-level class. There will be a fee for a required Bowling unit. More information will be given in class.

ADVANCED SPORTS FOR LIFE - This class is designed for the students who enjoy competing at a high level with like-minded students in sports and athletic activities. Teamwork, sportsmanship, and fair play are always expected. Competitive play will be encouraged and expected. There will be a fee for a required Bowling unit. More information will be given in class.

HUMANITIES

ART

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Foundational Studio Art			9,10,11,12	.5	Course fee applicable
Intermediate Studio Art			9,10,11,12	.5	Foundational Studio Art or Drawing/Painting, Course fee applicable
Drawing/Painting			9,10,11,12	1	Course fee applicable
Ceramics I	C	ART 1703	9,10,11,12	.5	Both courses must be taken consecutively in the same semester in order to gain concurrent enrollment credit; Ceramics I is a prerequisite for Ceramics II. Course fee applicable
Ceramics II	C		9,10,11,12	.5	
Printmaking			9,10,11,12	.5	Course fee applicable
Advanced Studio Art	C, H	ART 1110	10,11,12	1	Foundational Art and Intermediate Studio Art or Drawing/Painting and/or instructor approval, Course fee applicable
Advanced Ceramics	C, H	ART 1704	10,11,12	1	Ceramics I and Ceramics II; Course fee applicable
AP Art and Design	C, H, AP	ART 1002	11,12	2	Complete <u>four</u> other art courses and/or instructor approval; Course fee applicable
AP Art History	H, AP		11,12	2	

NOTES:

- For particular courses, students will be required to furnish their own supplies (i.e. clay, sketchbooks, canvases, etc.) based on the projects they choose. Course fees vary depending on the class.
- Concurrent Enrollment for Ceramics requires students to take I then II in one semester. For example, Ceramics I (quarter 1) and Ceramics II (quarter 2).

FOUNDATIONAL STUDIO ART - This course is designed for students who like to work in many different artistic areas to discover interests and abilities for further study. Students learn the primary skills of many visual art processes as well as design and creative strategies while working independently and collaboratively.

INTERMEDIATE STUDIO ART - Students continue exploring a variety of 2D and 3D art media, gain art appreciation, and increase creative abilities in this follow-up to the introductory Foundational Studio Art or Drawing/Painting courses.

DRAWING/PAINTING - Increase understanding of the skills and concepts used in the two-dimensional arts through the practice of drawing AND painting. Students will focus on using drawing concepts and painting techniques through a variety of media, gaining more control over design principles and personal voice.

CERAMICS I - Students explore ceramic work by learning traditional hand-building methods. Ceramic work is connected to typical functional ware and students design the work they create with personal interests in mind.

CERAMICS II - Using modern techniques in hand-built ceramic art, students create pieces that emphasize personal vision of concepts and themes. Various contemporary ceramic artists will also be explored in order to gain a deeper understanding of current work in the field of ceramics.

PRINTMAKING - Students are introduced to the production of multiple images from a single design using monoprint, collagraph, and relief printing processes. An emphasis on design thinking will encompass this uniquely exciting, yet ancient form of art-making.

ADVANCED STUDIO ART - A studio class for juniors and seniors with a desire to improve and increase artistic skills by working with a variety of media while studying traditional, modern, and contemporary art. Students will increase their understanding of art concerns and develop their own unique artwork.

ADVANCED CERAMICS - Utilizing hand-building and wheel-throwing techniques, students will develop ceramic work that pushes their personal comfort zones. Students explore concepts of their interest by developing a body of work that pushes boundaries in clay-making, often choosing to make large-scale and/or complicated work.

AP ART AND DESIGN - Students produce a college-level portfolio based on an artistic investigation of the students' choosing. Practice, experimentation, and revision are overarching processes leading to quality work that is evaluated by College Board in May (all portfolio types are offered - AP Drawing, AP 2D Art & Design, and AP 3D Art & Design).

AP ART HISTORY - A college level survey course of art history from prehistoric cave paintings to installations of the 21st Century through the focus painting, sculpture and architecture. Participants are expected to take the AP Art History examination in May.

MUSIC

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Marching Band			9,10,11,12	1	Past participation in middle school band program or with permission of the instructor; course fee applicable
Symphonic Band			9,10,11,12	1	Audition; marching band; selection by director; course fee applicable
Percussion			9,10,11,12	1	Instructor approval only
Jazz Band			9,10,11,12	1	Instructor approval only
Music Appreciation			9,10,11,12	1	
Music Theory Part A			10,11,12	.5	
Music Theory Part B			10,11,12	.5	Successful completion of Music Theory Part A
Music Technology and Production			10,11,12	1	
Concert Choir			9,10,11,12	1	
Tiger Ladies			10,11,12	2	Audition; selection by director
Encore!			10, 11, 12	2	Audition; selection by director
Vocal Music Performance			10, 11, 12	.5	Must be concurrently enrolled or have passed a vocal performance ensemble (Tiger Ladies, Encore!)

MARCHING BAND - The Marching Band is a competitive musical ensemble that performs at all home football games, several marching contests, pep rallies, assemblies, and parades. This course is required of all students who wish to participate in other band programs. There are performance dress requirements/costs and activity fees.

SYMPHONIC BAND - The Symphonic Band and Wind Ensemble are performing ensembles that participate in formal concerts and festivals for 2nd through 4th quarters. This course is required of all students who wish to participate in other band programs. There are performance dress requirements/costs and activity fees.

PERCUSSION - Percussion class is designated for CCHS Symphonic Band/Wind Ensemble percussionists only. Percussionists will work on concert band literature, percussion ensemble literature, and begin work on the upcoming school year's competitive field show music. All percussionists will be expected to perform with Symphonic Band and/or Wind Ensemble throughout the concert season.

JAZZ BAND - This course is an in-depth study of advanced instrumental techniques as they relate to jazz literature. The Jazz Band will participate in local concerts, festivals, and community activities. Students must be active members of the CCHS instrumental music program (some exceptions may be granted on a case-by-case basis and with instructor approval).

MUSIC APPRECIATION - Covers the basic materials of music, musical forms, media, and genres. This course emphasizes the development of tools for intelligent listening and understanding of music. Students will not perform in a formal concert, but may be required to attend designated concerts as part of the course.

MUSIC THEORY PARTS A/B – Part A: Students will learn skills and gain knowledge that are foundational to the understanding of music, including notation, pitch, rhythm, meter, and key. **Part B:** Students will develop a deeper understanding of more complex musical elements, including chord theory, transposition, harmonic progression and composition. *(Must successfully complete Music Theory Part A to participate in Music Theory Part B)*

MUSIC TECHNOLOGY PRODUCTION - Students will learn the technical use of live sound equipment; music recording and production equipment; digital audio recording and mixing software; and compositional software. In addition to technical skills, basic music theory, composition, and critical evaluation skills will be taught.

CONCERT CHOIR - A semester long introductory vocal performance class where students are introduced to basic music theory and a variety of styles and genres of music and performance through singing. Additional performances are also **required** as part of the course grade. There are performance dress requirements.

TIGER LADIES - Tiger Ladies is an advanced auditioned women's choir with an emphasis on the mastery of a variety of styles and genres of music and performance. Basic and intermediate music theory will be included in the curriculum. Students who are selected to be in Tiger Ladies will be enrolled for the entire school year in which they make the commitment. Additional performances and outside obligations are also required as part of the course grade. There are performance dress requirements.

ENCORE! - Encore is an auditioned mixed chorus for the most advanced vocal music students at CCHS and emphasizes the mastery of a variety of styles and genres of music and performance. Basic, intermediate and advanced music theory will be included in the curriculum. Students who are selected to be in Encore! will be enrolled for the entire school year in which they make the commitment. Additional performances and outside obligations are also required as part of the course grade. There are performance dress requirements. CCHS Madrigals Singers are chosen each year from members of Encore providing an additional performance opportunity. Academic Honors Credit for Music is available to senior Encore members in good standing who meet credit requirements and pass both a Music Theory Exam and a Performance Jury. See instructor for more information.

VOCAL MUSIC PERFORMANCE -This course is designed to help students prepare for auditions, contests, honors juries and/or performances beyond the classroom. Students will prepare/master vocal solo/ensemble performances in various styles including classical art songs and music theater. Students will learn/practice proper, and stylistically appropriate, vocal techniques. In addition, students will be coached on acting and presentational skills. Individual and group performances are required for this course. *(Must be concurrently enrolled or have passed a vocal performance ensemble (Tiger Ladies, Encore!) or per instructor approval)*

THEATRE AND VIDEO PRODUCTION

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Drama I			9,10,11,12	1	Course fee applicable.
Drama II	C	THE 1005	9,10,11,12	1	Drama I or instructor's approval
Drama III	C	THE 1005	10,11,12	1	Drama I and Drama II
Technical Theatre	C	THE 1016/1031	9,10,11,12	1	
Video Production I			10,11,12	1	
(H) Speech	H,C	COM 1150	10,11,12	1	English 9 or (H) English 9
Broadcasting			10,11,12	1	Video Production I; competitive selection process
Film Editing	C	MGD 1064	10,11,12	1	Video Production I

**These courses count as Humanities credit when they're taken in 9th or 10th grade. Some of these courses can count as English credit if they're taken in 11th or 12th grade. See English Language Arts page, List B, for a full list.*

DRAMA I - An introduction to all aspects of the theatre world. Students will act, design, learn theatre history, and apply makeup. \$25 course fee.

DRAMA II - An advanced study in theatre. Students will research theatre history, participate in advanced actor training, and write and produce plays.

DRAMA III - This is an intensive course in theatre production, specifically acting. Students will be instructed in advanced acting skills as well as auditioning, improvisation, playwriting, direction, and dramatic literature. Drama III will emphasize instruction for the post-secondary work in community theatre and collegiate theatre. Students will be expected to participate in all productions. Students taking the course must remain in the course for a full semester to earn senior English credit.

TECHNICAL THEATRE - An introduction to all aspects of technical theatre. Students will learn lighting, sound, set, costume, props, and makeup design and implementation. Students will participate in the technical aspects of stage productions during class. Students can earn a "List B" English credit from a full semester of participation in either their junior or senior year.

(H) SPEECH - This course introduces students to the principles of speaking and listening theories and techniques. The purpose of this course is to enable students to better understand the theories and practices of speaking and listening. Through this course, students will develop the skills necessary to critically evaluate the written and spoken speeches of others while also developing speech-writing and delivery skills.

VIDEO PRODUCTION I - An introduction to film history, video basics, editing, media and the production process. Students can earn a "List B" English credit from a full semester of participation in either their junior or senior year.

BROADCASTING - An introduction to video broadcasting, studio work, advertising, and video editing for broadcast. Students can earn "List B" English credit from a full semester of participation in either their junior or senior year.

WORLD/FOREIGN LANGUAGES

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Spanish I			9, 10, 11, 12	1	
Spanish II			9, 10, 11, 12	1	Spanish I
(H) Spanish III	H		10, 11, 12	1	Spanish II, or instructor recommendation.
(H) Spanish IV	H		11, 12	1	Spanish III or written teacher recommendation; new students must be assessed by Spanish teacher to be placed in Spanish IV
French I			9, 10, 11, 12	1	
French II			9, 10, 11, 12	1	French I

SPANISH I - Students will develop a basic understanding of Spanish. Students will have the opportunity to develop skills in speaking, reading, writing and listening. Knowledge will be enhanced through the study of culture, history and geography. Basic sentence structure is introduced. Active participation is required.

SPANISH II - Intermediate students will have the opportunity to use and reinforce fundamental skills. Increased communication will be developed through speaking, reading, writing and listening. Students are challenged to interact and communicate in Spanish. Cultural studies will enhance learning opportunities.

(H) SPANISH III - Level three students will continue to have the opportunity to use and reinforce fundamental and more advanced language skills. Increased and higher level communication will be developed through speaking, reading, writing and listening. New grammatical structures are presented and previous grammar is reviewed. Cultural studies will enhance learning opportunities.

(H) SPANISH IV - Emphasis is placed on the use of everyday, practical conversational skills, acquisition of new vocabulary, and review of grammatical structures. Written and oral analysis of Spanish and Latin American literature is included in the course.

FRENCH I - Students will develop a basic understanding of French. Students will have the opportunity to develop skills in speaking, reading, writing and listening. Knowledge will be enhanced through the study of culture, history and geography. Basic sentence structure is introduced. Active participation is required.

FRENCH II - Intermediate students will have the opportunity to use and reinforce fundamental skills. Increased communication will be developed through speaking, reading, writing and listening. Students are challenged to interact and communicate in French. Cultural studies will enhance learning opportunities.

EXCEPTIONAL STUDENT SERVICES

EXCEPTIONAL STUDENT SERVICES

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Transitions I			9,10,11,12	1	IEP staffing, committee recommendation
Transitions II			9,10,11,12	1	IEP staffing, committee recommendation
Basic Skills Math I			9,10,11,12	1	IEP staffing, committee recommendation
Basic Skills Math II			9,10,11,12	1	IEP staffing, committee recommendation
Language Arts 1			9,10,11,12	1	IEP staffing, committee recommendation
Language Arts 2			9,10,11,12	1	IEP staffing, committee recommendation
Character and Resource Education Lab (CARE)			9,10,11,12	1	IEP staffing, committee recommendation
CARE Math/Science			9,10,11,12	1	IEP staffing, committee recommendation
CARE Reading Writing/Social Studies			9,10,11,12	1	IEP staffing, committee recommendation
Electronic Recycling			9,10,11,12	.5	IEP staffing, committee recommendation
Direct Instruction			9,10,11,12	1	IEP staffing, committee recommendation
Academic Improvement			9,10,11,12	.5	IEP staffing, committee recommendation

TRANSITIONS I - This semester-long course is designed for students who require a modified curriculum to gain independent living skills in areas such as, but not limited to: Personal care, interpersonal skills, career education, independent living, personal finance, and community resources.

TRANSITIONS II - This year-long course is designed for students who are on IEPs to help them develop independent living skills. Instruction includes topics such as obtaining and caring for a living space, exploring career options, practicing important job-related skills, personal finance, personal care, and community involvement.

BASIC SKILLS MATH I - This course is specifically designed for students who require a modified curriculum in the area of math. The course focuses on basic math calculations involving money, time, fractions, decimals, and measurement as daily life skills to solve real-world grade-level problems.

BASIC SKILLS MATH II – Basic Skills Math II focuses on real-world math applications where students will work on whole numbers, fractions, decimals, percentages, integers, order of operations, geometric shapes, setting up and solving one-step and two-step equations while working with grade-level real-world word problems.

LANGUAGE ARTS 1 - This semester-long course is designed for students who require a modified curriculum using a variety of strategies to improve their functional reading and writing skills in order to communicate their needs in a community setting. There is also a prescriptive, research-based curriculum that offers grade-level content which is highly modified to meet individual student needs.

LANGUAGE ARTS 2 – This year-long course will allow students to explore the writing process and to build upon their reading and analysis skills. Students will write a paragraph with a thesis statement, two or more details, and transitional phrases or wording. Students will learn to write drafts, use graphic organizers, and revise their writing. The writing aspect of this class includes the study of grammar and usage as well as vocabulary. The reading element of this course will integrate reading comprehension, fluency, vocabulary, decoding skills, and written expression to help students improve their reading skills.

CHARACTER AND RESOURCE EDUCATION LAB (CARE) - Students will explore and work on skills such as self-managing and self-direction within the educational environment. The course is tailored towards the student's individual social and academic needs.

CARE MATH/SCIENCE - This year-long course is specifically designed for students who require a modified curriculum in the area of science. The course focuses on prescriptive, researched-based interventions for basic science skills in biology, ecology, chemistry, earth science, and physics.

CARE READING WRITING/SOCIAL STUDIES - The year-long course is specifically designed for students who require a modified curriculum in the area of social studies. (This class provides students who are seniors and require a modified curriculum with the instruction in one semester to earn one credit in American Government.

ELECTRONIC RECYCLING - Students will learn entry-level job skills including customer service, workplace safety, hand tools, inventory, and production methods in an actual business setting. Soft work skills like teamwork, problem-solving, work ethic, dependability, and attitude are emphasized during the course. Additionally, students will learn basic electronics and computer hardware terminology and some basic computer repair techniques in the advanced sections.

DIRECT INSTRUCTION - This semester-long course is specifically designed to educate students about their transitional IEP. The course provides students with the instruction that builds the necessary skills that students require to become knowledgeable about their IEP as well as become self-directed, self-managing, and a self-advocate within the educational environment.

ACADEMIC IMPROVEMENT - This quarter-long course builds independent skills that focus on identifying and strengthening strategies to be successful with academic work, along with social skills, and problem-solving skills for real-life situations. This support allows students to successfully meet the challenges of work in high school and beyond.

STUDENT PROGRAMS

STUDENT PROGRAMS

Course Title	Course Designation	Concurrent Enrollment Course Equivalent	Year	Credit	Recommended Prerequisite
Link Crew Leadership			11,12	1	Interview and selection process required
Foundations of Leadership			10,11,12	0.5	
Student Assistant			10,11,12	.25	Teacher recommendation
Independent Block			12	0	Counselor approval; must be on-track for graduation
Credit Recovery			9,10,11,12	varies	Must have failed a course once; required to pay \$55 per course/quarter depending on progress
Invent2Prevent	C	AAA 1009	10,11,12	1	

LINK CREW LEADERSHIP – This course is intended to tap the potential and maximize the benefits of the selected CCHS Link Crew leaders. These benefits include increased sense of community, improved school climate, and successful transition of new students into The Pride culture. This class allows Link Crew leaders the time and opportunity to build and foster relationships with freshman and new students as well as opportunities to plan and implement all activities of The Pride.

FOUNDATIONS OF LEADERSHIP – This course is designed to prepare students to be leaders by engaging them in a character development process that focuses on building relationships with others. It provides an opportunity to learn about what strong character looks like and allows students to examine their own character and determine where growth needs to occur. This self improvement will help them add value in both their personal and professional relationships. The practical and engaging curriculum will use real world experiences to show students how learning about leadership can impact their own lives.

STUDENT ASSISTANT - Assistants perform a variety of tasks as assigned by staff. It will be the student's obligation to seek out a staff member in need of assistance and supply the guidance office with a signed form from that staff member. Student assistants may be employed in the following areas: library, individual teachers, guidance office, main office, nurse's office, custodial, etc. Students may be an assistant only one block per day. This course is graded pass/fail and will not count towards GPA, total grade points or class rank. The student will receive ¼ credit for each quarter. **Students not maintaining enough credits to graduate on time may not sign-up for a student assistant position without the permission of the principal.**

INDEPENDENT BLOCK - No credit offered for this class. Students must either be off-campus, in the library, or in the commons area.

CREDIT RECOVERY (CR) - After failing a course, a student no longer has the option of retaking that course in the classroom. The student may take the course either during summer school or during designated credit recovery periods.

INVENT2PREVENT - The Invent2Prevent program provides an opportunity for you and your teammates to create and activate your own products, tools or initiatives to prevent targeted violence. In addition to becoming involved in reducing targeted violence and hate, the I2P program builds a community of your peers from all over the United States who are interested in this important topic. Invent2Prevent empowers you to prevent targeted violence and hate through the development of dynamic, integrated projects. (Center for Prevention Programs and Partnerships, 2021).
